USB and ETHERNET connections

Stand-Alone Controller

# Lighting control **WITHOUT LIMITS**

The SLESA-UE7 is the latest groundbreaking product from Nicolaudie - A fully stand-alone lighting solution for controlling large amounts of DMX channels.

Connect several SLESA-UE7 DMX controllers to a switch or router, then program a multi-universe show using the ESA Pro PC software with timelines and effects. One interface acts as a master, and the others follow with perfect synchronisation making this the ideal control solution for LED matrixes and long distance installs.
