

FLATYZ

hand-crafted flat candles

— 2024 —

About FLATYZ candles

Inspired by changing the conventional way of candle making, FLATYZ began its story in 2012. Our co-founders launched FLATYZ with the idea to create the world's first-ever flat candle that would serve as a beautiful canvas for hand-painted designs.

All FLATYZ candles are made in Lithuania by the meticulous handwork of our artisans, making each candle authentic and unique. With over 200 designs, our hand-poured and hand-painted candles decorate and illuminate every space, occasion, and ambience.

FLATYZ is proudly the world's most unconventional and beautifully hand-crafted candle today. We thank you for helping us spread the light!

Hand-crafted with love,
The FLATYZ Team

Our Candles

The production technology of a flat candle includes the formulation of paraffin mass, temperature control, forming, tooling, and decorating. These techniques are all mastered by dedicated team members at FLATYZ. The product itself, a flat candle with an assembled base is our patented invention.

We manufacture a unique product challenging the stereotypes of candle shapes and design. Our talented artisans not only pour each candle by hand but also decorate them using various manual artisanal techniques.

Process..

1/

Before decorating FLATYZ candles are hand-poured, hand-cut and hand-dipped in a special paraffin mass.

2/ For candle decoration we use only particular safe-to-burn paints made in Germany.

3/ Our artisans decorate each candle by hand - so every product is authentic and unique.

4/ Later these pieces of art are carefully packaged by hand, ensuring maximum protection during transportation.

Custom

We are able to produce a custom flat candle using your unique design. Whether it is a special celebration, a company gift, or a promotional item highlighting something important, we would be pleased to evaluate your request.

Tips for Properly Burning a Drip-resistant Candle

- Never leave a burning candle unattended;
- Make sure there are no combustible objects near the burning candle;
- Do not keep the candle in direct sunlight, near heaters or fireplaces as it may cause it to deform and/or change color;
- Do not burn the candle when draft is present i.e. fan, open doors/windows, high traffic area. As all drip-resistant candles, flat candles may drip given such unfavorable conditions;
- In the event that the candle starts to drip - put it out. Let it completely cool off, remove the paraffin that has run down, clean the wicks and relight after moving it to a different location;
- A paraffin stain is easily removed from a hard surface by heating it with a hairdryer OR by placing a cotton napkin on the paraffin stain and ironing over it on a low heat setting;
- Smother the candle to extinguish.
