

# FM100 PERFORATOR AND CREASER

Tabletop design makes the FinishMaster 100 portable and easy to set up. The feeder design ensures consistent and true feeding throughout the job.

The accessory holders, each individually adjustable, allow easy blade changes to minimize set-up time and effort. The anvil-style perforating provides a flat, burr-free finish capable of being fed through any subsequent finishing equipment with ease. And with a maximum production rate of 10,000 sheets per hour, the "100" makes short work of your perf/score/slit needs.
