

Jet Stream Digital F-35

High Release - Digital Dye Sublimation Transfer Paper

For use with all Epson & Ricoh sublimation printers and inks
Transfer images onto hard and soft sublimation substrates

➤ PRINT SIDE UP ◀

- Store the paper in a clean moisture free environment.
- Store flat and ensure the paper does not curl.
- Make sure you are printing onto the correct side of the paper.
- Mirror your image unless pressing onto glass or acrylic where the image shows through from the rear.
- Refer to sublimation pressing charts for your times and temperatures.

Typical Pressing Guides			
SUBSTRATE	TEMPERATURE	TIME	PRESSURE
Fabrics (T-shirts etc)	190-200°C	60 seconds	Med
Metal	180-200°C	45-65 seconds (1)	Med
Chromalux	190-200°C	75-95 seconds (2)	Med/High
Mousepads	190-200°C	60 seconds	Med
Mugs	190-200°C	4 minutes (3)	High

(1) Varies depending upon the coating – refer to manufacturers recommendations.

(2) Varies depending upon the size of the board.

(3) Mug presses come in many styles and designs – refer to mug press manufacturers recommendations.
