ASIAL

Australian Security Industry
Association Limited

Thank you for your interest in our range of quality security products – protecting what's important to you and your organisation.

As a security specialist, Security4Transit (S4T) develops and manufactures products that protect cash, valuables, confidential documents and goods in transit and storage.

What's featured in this catalogue is a representative sample of a larger range that can be viewed on our website at www.powdersafe.com.au.

S4T manufactures in many locations around the world and supplies its products through authorised distributors. You will find the contact details for the authorised distributor that supplied you with this catalogue on the back page. We invite you to contact them to discuss your specific requirements.

From tamper-evident (TE) bags to security seals and one time use security satchels, S4T holds a large range of stocked products in its Australian warehouse for next day dispatch.

In addition, our offering is strengthened by our ability to custom manufacture to the exact requirements of our clients. Every stock item in this catalogue can therefore be effectively customised to a specific client's brief.

Our advantage stems from our flexibility – whether a short run, complex or urgent project manufactured in Australia, or a large volume low cost project in our Asia based facility, we have numerous options that will meet your requirements.

You will see the SCEC logo (Security Construction & Equipment Committee) placed next to some products in the catalogue. A SCEC approved product means that that item has been rigorously tested and approved by the appropriate Australian government agency. It is important to note that we can vary the specification of SCEC approved products under strict guidelines.

The culmination of over 25 years manufacturing experience means that Security4Transit can provide a wide range of well-priced custom made and stock products to meet the demands of its clients – government, corporate, small business, educational and not-for-profit.

SECURITY4TRANSIT

SECURITY4TRANSIT

Locking Products are protected by the high security Arcolock-7® keyed locking mechanism. Used by financial institutions across the world for over 70 years, these Locking Products are the ideal product to store and transport coin, currency, cheques and valuable documents. Many organisations including government, corporate, and professional firms - in fact, any operation which handles cash, currency or valuable papers - choose locking products for their internal cash and document protection.

Each bag/satchel is supplied with two keys. Locking products are supplied with individually keyed lock. If you wish to purchase keyed alike or master keyed products, please specify this in your enquiry. Keyed alike or master keyed bags are custom manufactured to order.
