## FIRST BURN TIPS

First trim your wick to 1/4 inch.

Light all wicks & let the candle burn until the entire top of the wax is melted & is "wet". This sets a memory in your soy to always burn to the outer edges of the candle & not straight down the wick.

## ***BURN TIME***

Do not burn your candle longer than 4 hours at one time to get the best scent throw & cleanest burn.

## ***CANDLE CARE***

Always trim your wick bud before every burn. Do not blow out your candle. Use the lid or candle snuffer to keep your candle looking clean.

## ***CLEANING YOUR CANDLE***

When your candle is done fill it with hot water and soap. Let it sit for 10-15 minutes. Wash it out and dry it. You can now repurpose your jar!
