

**Mouse Free Warranty**

UNLIMITED RENEWABLE TERM, NO MILEAGE RESTRICTIONS AND TRANSFERABLE\*\*

The Warranty Certificate applies to New Vehicles (within 30 days of vehicle purchase date).

The Mouse Free Warranty Program is designed to offer maximum protection against the entry of mice through the undercarriage of a vehicle. When applied by an authorized Mouse Free Dealer and the customer follows the program and the required application cycles; Certified Earth Friendly Technologies Corporation will authorize and arrange, at its expense, for the repair of any items within the unit that have been damaged by mice\*.

The product is designed to prevent entry of mice into Recreational Vehicles by preventing entry through the small holes that exist to accommodate the passage of wires and hoses within the undercarriage or under body of a trailer or motor home.

The most common places for mice to gain entry to a unit are through the undercarriage. The Mouse Free product protects and prevents mice from gaining entry to the entire undercarriage.

The Mouse Free product cannot prevent entry of mice into recreational vehicles in the following circumstances but not limited to:

- 1) A door left open.
- 2) The power supply compartment improperly sealed shut.
- 3) Storage areas that are left open.
- 4) Parking within 48" of overhead tree branches. (Mice crawl across branches to gain access to the roof.)

Although it is less common for mice to enter the unit through these previous examples, it demonstrates how mice may gain entry in ways other than through the undercarriage. Therefore, the warranty limits the liability and the total amount that can be claimed to \$500.00, or a full refund of any money received as payment for the application, whichever is greater.

It is understood that the warranty is specifically tied to repeat applications. The reapplication must be completed within 12 months of the previous application in order to keep the warranty in good standing.

The total liability to Certified Earth Friendly Technologies Corporation will be limited to the cost of repairs as covered by the warranty. Certified Earth Friendly Technologies Corporation, under the terms of the warranty, shall not be responsible for lost time, cleaning, disinfecting, inconvenience, consequential damage or loss of use of vehicle while being repaired and at its sole discretion may limit the warranty to one claim.

Although the product prevents crawling insects, and other pests such as squirrels from gaining entry through the undercarriage, the warranty in no way implies coverage to any pests other than the common mouse. Any claim must be a result of damage due to mice only.

The certificate is offered in lieu of any and all expressed warranties made with the transaction, and Certified Earth Friendly Technologies Corporation shall have no further liability whatsoever for damages other than those covered by the agreement.

\*Roof top air conditioning units, engines, electronic sensors and personal material possessions are specifically excluded from warranty coverage.

\*\*After vehicle inspection, a transfer fee of 20 dollars is payable to Certified Earth Friendly Technologies Corporation. The transfer must be completed within 60 days of vehicle transfer.
