

ACAMPORA

PROFUMI

A journey through time from New York to Pompeii, it's Acampora Profumi invitation for this edition of Pitti Fragranze.

Join the Conference Room on September 14th at 4:00 pm for the launch of two brand new collections and a trip back in time. Miguel Matos - perfumer and dear friend of Sonia and Brunello Acampora who co-created the fragrances - talks about the inspirations behind the collections. From revisiting New York Studio 54 and the crowd of artists and dreamers to which Bruno Acampora belonged to, till the Pompeian splendor in Lawrence Alma-Tadema paintings.

Classic and modern, tradition and innovation translated into 9 new, surprising and unexpected fragrances. Be the first to sniff them at booth A10.

Acampora Fiftyfour

A collection that is also an invite to dance with your senses and more. The energy and dynamism of Studio 54 resonate amazingly with Acampora DNA and translate into perfectly imperfect fragrances you will be addicted to.

Pure joy and extravaganza.

Bruno

It could be none but Bruno the leading fragrance of this eccentric collection: the most precious of the Oud, a tribute to the multifaceted personality of the founder of the Maison. Here is a fragrance with a fluid soul able to seduce everyone thanks to the citrus notes and the floral triumph in the heart. A timeless classic that gives a feeling of freshness and lightness.

Note: grapefruit, cut grass, rose, saffron, cedarwood, amber, musk, sandalwood, patchouli, oud, resins.

Robin

Robin is the memory of a dancing spree, the feeling of happiness that comes from partying without any regrets. The scent is an extravagant and unusual combination of aldehydes with a floriantal composition where tuberose plays the dominant part in the floral bouquet, along with its dancing pair, incense. To sweeten it all up, there is a good scoop of vanilla and coconut in the base, which rounds the perfume while creating a connection with the other fruits on top. The result is an emotional and dynamic fragrance that has an ever evolving movement.

Note: aldehydes, anise, black cherry, cassis, mandarin, almond, tuberose, ylang ylang, jasmine, iris, incense, musk, vanilla, cedarwood, tobacco, coconut.

Young Hearts

Dewy, fresh, green and peculiar, Young Hearts follows a different rhythm everytime you try it. The opening is woody and green, fresh and very natural with the invigorating notes of bergamot, galbanum, birch and pine. A cold breeze is brought by saffron, which imparts also a leathery impression. The heart elongates the foresty smell of pine with fir balsam, along with a rather abstract floral arrangement. To make it grounded, there is a chypre accord that keeps the beat cool, with a timeless signature.

Note: bergamot, galbanum, birch leaf, pine, saffron, jasmine, fir balsam, rose, oakmoss, patchouli, musk, amber.

Freak Chic

An opulent floral chypre that has seduction as its main purpose. A spiced up rose, made intense and unapologetic. There is energy and life pulsating with fruit accords of apple, bergamot, passion fruit, mandarin and raspberry, spiced and refreshed with the zing of ginger. The full-bodied character of the scent is reinforced by the strength of woods and the sexy animalic tones of warm musks and honeyed beeswax. Freak Chic is a vibrant, never-stopping rosy anthem with elegance in its core.

Note: apple, ginger, bergamot, passion fruit, mandarin, jasmine, rose, chamomile, musk, teak, patchouli, ebony, cedar moss, raspberry, beeswax.

Relight My Fire

A memory from the past invades the dancefloor. A contrast of sweet and bitter, fresh and deep. Relight my Fire alludes to rich classic perfumes with its resinous-floral-aldehyde structure. Captivating, intense and dark, it bursts like champagne bubbles, along with green bracing notes of galbanum and the freshness of bergamot, coriander and juniper. This masculine opening turns into a more feminine heart made of classic florals and the clashing contrast of balsam fir. The base is animalic and warm, with a dominant peru resinoid note, heightened by leather, vanilla and musk.

Note: aldehydes, bergamot, coriander, juniper, galbanum, jasmine, mimosa, geranium, violet, fir balsam, musk, peru resinoid, vanilla, animalic notes, leather.

Read My Mind

Musky and warm, Read my Mind is a seductive combination of fruity, spicy and carnal elements, where pomegranate and saffron are the lead dancers. The fragrance is particularly juicy, due to the zests of lemon and bergamot but it gets sweet with the touch of almond. The arousal of this moment is symbolized by cumin and classic florals like jasmine, ylang ylang and magnolia. Read my Mind is a seductive presence that hypnotizes with the strong and reassuring embrace of woody notes like ebony, patchouli, sandalwood and teak. Deep and complex, but easy to follow.

Note: almond, saffron, pomegranate, lemon, bergamot, jasmine, iris, ylang ylang, magnolia, cumin, musk, leather, ebony, patchouli, sandalwood, teak.

Keep On Dancing

Greedy and dark, Keep On Dancing is, above all, a scent of addiction and energy. Chocolate, coffee absolute, tea, rum and tobacco generate this energy that is softened by its gourmand notes of vanilla and woody tones to keep the room under control. The contrast to these notes is a feature given by lime and lemon. But the base brings it back to darker corners of the ballroom where seduction takes place with tonka bean, vanilla, musk and leather. Under dimmed disco lights, the dance can never stop after all these addictive notes have been smelled.

Note: lemon, lime, rum, chamomile, woody notes, coffee, chocolate, tobacco, cashmeran, tonka bean, musk, vanilla, leather, patchouli, vetiver, mate.

Tadema Collection

A collection to celebrate the splendor of Pompeii and the Mediterranean with its paintings and unique perfumes.

A journey of the senses and imaginary to evoke a multisensory pleasure.

Mentuccia Romana

The Mediterranean coast is a paradise for the lovers of aromatic herbs, and some of them are very special, like pennyroyal, or mentuccia romana, a very special kind of mint that is softer and more floral, with refreshing and calming properties. Here, it comes balanced with basil, lavender and citrusy tones of lemon zest and bergamot. The coolness is preserved in time with a woody-mossy base. Perfect to soothe and calm down your senses.

Note: lemon, basil, bergamot, pennyroyal, lavender, litsea cubeba, cedar moss, musk, woody notes.

Citrea Prochyta

Classic with a twist, Citrea Prochyta could be a vintage-style refreshing cologne made with the best lemons found in the idyllic island of Procida. The heart brings energy with aromatic notes of rosemary. But this lemonade is not that simple and it comes with the deep tones of a chypre base, with woody, mossy and soft animalic undertones. Invigorating and inspiring, this is a fresh citrus scent with an unexpected and longlasting finishing touch.

Note: lemon, bergamot, mandarin, neroli, rosemary, oakmoss, white musk, animalic notes, coumarin.

Malum

The juiciest apples picked from the orchards by the Mediterranean coast make us smile with their sweet scent and nourishing flavour. In Malum, a profusion of apple juice is tuened deeper with spicy tones of ginger, cinnamon, cardamom and anise. The freshness is ensured and contrasted with marine notes and green floral nuances of lily of the valley. An oriental base rich in tonka bean, vanilla and woody notes makes Malum finish in a deep, sensual tone.

Note: apple, ginger, cinnamon, cardamom, marine notes, lily of the valley, fennel, anise, tonka bean, musk, patchouli, sandalwood, vanilla.

The world of Acampora Profumi

Our mission is to offer an astonishingly beautiful experience that will turn into **unforgettable emotions**. Founded in 1974 by a Neapolitan gentlemen, the company still mixes today tradition and future vision in the small family-owned laboratory. Utterly aesthetic thanks to the finest raw materials and a never ending process of learning elegance.

Our values

Heritage

There are currently 19 different fragrances in production. They are contained in metallic glass bottles closed with cork stoppers that let our essences breathe and sealed with sealing wax, proof that each bottle is bottled by hand.

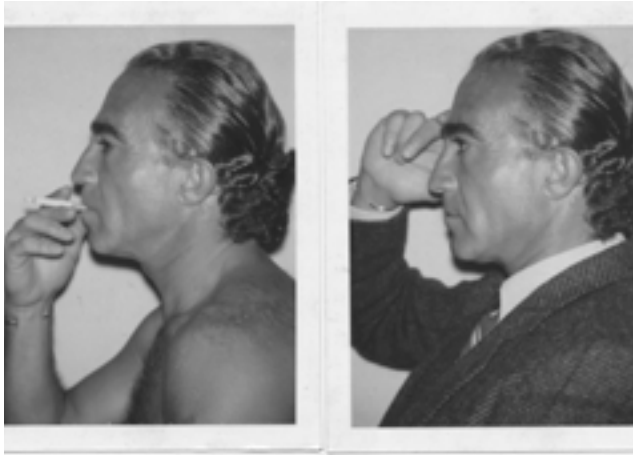

Quality

The formulas of our essences are among the most complex: some fragrances contain more than 100 precious components that are collected in various corners of the globe. Subsequently, the fine ingredients are used in cold mixing processes that give rise to pure undiluted oil. This is the genesis of the unmistakable notes of Acampora Profumi.

Craftmanship

For over 40 years the heart of Acampora Profumi is its family-run laboratory. There are few artistic perfumery companies that have maintained the ability to formulate, develop and produce artisan fragrances of the highest quality.

The story of the olfactory journey

Bruno Acampora's fragrances are among the greatest expressions of meticulously crafted creations of the author, a jewel of Italian handmade. The essences are high perfumery creations that contain the story of a long olfactory journey that began over forty years ago, which accompanied the life of a great exponent of Italian fashion, a lover of beauty and a lover of travel.

The result of this journey is to have captured all sorts of scents and shaping them into fine perfumes.

Everything is started with a very private Musc, so different from all the others. The next step was, of course, the born of Bruno Acampora Profumi. With time and passion, now there are 19 extraordinary essences.

The founder, Bruno Acampora

He is the founder of the homonymous perfumery house, a man of great charm and elegance, curious and creative.

His perfumes are a source of inspiration in turn of feelings, memories, emotional values that personal reality makes its own.

The landscapes and colors of nearby and distant lands find inspiration in his creations, in an unbridgeable fusion of instincts that every connoisseur of artistic perfumery perceives to the fullest.

In his life, lived with passion and determination, every moment was important to know and to mature ideas as well as to create material things and not, like the strong human ties that his ancient perfume house still remembers today with so much nostalgia.

His journey into the world of essences begins with the encounter with the French nose Giovanni Varon on the beaches of Saint Tropez in the 1970s.

From that meeting his whole life was pervaded by the search for exclusive and unique olfactory creations. Every place, every stage, marks a unique emotion in its soul: Lebanon, Kenya, Morocco, Egypt, the Sahara desert, Venice, Capri, the Antilles, Rio de Janeiro, India, China and Japan.

The art of making rare essences

Acampora Profumi, despite being a modern company projected to the market, safeguards and implements production systems in total craftsmanship and manual skill. Each essence, obtained by mixing a wide range of selected raw materials, follows the complete maceration phases precisely to emphasize its persistence and the right balance between hold and pleasant smell. They are packaged as if they were a fine liqueur and sealed according to the use of the ancient French perfume masters. The final essence is an extraordinary alchemy, emphasized and enhanced by each raw material contained.

The discovery of the nuances, the notes, the chords, is done step by step as for every olfactory construction: head, heart, bottom.

Acampora Profumi continues its activity today thanks to the dedication of Bruno's son, Brunello Acampora with his wife Sonia. Just like Bruno, Brunello is a curious explorer, a successful man who founded Victory Design, a leading Italian company in the design of luxury yachts.

He started working at the family company to continue the work of his father, his mentor who over the years has handed down to him all the precious secrets to enhance the creation of extraordinary fragrances.

Today Brunello and Sonia continue to develop the company both nationally and internationally without abandoning that familiar flavor, a winning weapon of continuity and an element of differentiation with respect to purely commercial realities and visions.
