InnoGear Aromatherapy Diffuser

Operation

1. Lift up the cover.
2. Add the right amount of water (not exceeding the MAX line) and a few drops of essential oil into the water tank.
3. Press the power button to turn on the diffuser. The color will change per press. Long press to turn off the light.
4. LIGHT button

Precaution

- The power adapter is packed in the water tank of diffuser. Please lift up the cover to find it.
- To prevent the rubber of the diffuser from being damaged, do not put illegal voltages or voltage greater than 150V. Due to its function of protection, the diffuser will stop working when the water is below a certain level.
- Do not touch the ultrasonic vibration plate when working.
- Unplug the unit before maintenance and clean regularly with damp cloth, do not use water, soap, or other cleaning products.
- Keep away from direct sunlight, heat source and air conditioners.
- Always turn off the machine before cleaning.
- Do not place an iron, heat or combustible area.
- Keep away from electronic equipment, such as TV and other electrical equipment.
- Do not fill water directly into the water tank when operating. Overseas water may enter the machine and cause malfunction.
- Please clean the product before changing to another source of essential oil according to the instructions.
- Please make sure the water level is balanced with this diffuser. Low water level of this machine can cause malfunction, low quality of oil that contains chemicals, oils, or impurities may cause malfunction.
