InnoGear
USB Powered Aroma Diffuser
User Manual

Instruction
1. Connect the included USB cable to the DC Socket.
2. Lift up the upper lid.
3. Fill water no more than 50ml below the MAX line, Add few drops of essential oils.
4. Put the upper lid back on.

Note
Diffuser may automatically turn off when making sudden breaks as water gets depleted.

FAQ
Q. Why can’t I smell anything?
A. The strength of smell from different essential oils may vary. Choose a strong scented oil or don’t put the diffuser near an air conditioner, fan or window.
Q. Can the lights change be set to one specific or only?
A. Yes. Just press the LIGHT button.
Q. Can I turn off the light by pressing the Power button?
A. Yes. Press the Power button three times, and both light and mist will turn off.
Q. Can I turn the lights off and just use the mist?
A. Yes. There are separate buttons for the lights and the mist.

Troubleshooting
No power
USB cord connected improperly?
- Connect it correctly.
The control button is not depressed?
- Depress the button again.

No mist or low mist
- Not using the appropriate adapter?
- Please use our power adapter with at least 5V 1A to power on the diffuser.
- No enough water or too much water?
- Please add the right amount of water. Fill water above minimum level but do not exceed max.

Low mist or no mist, while water tank is full
- The transducer is dirty?
- Clean the transducer.
Did you make a sudden stop while driving?
- If you turn your car off without turning the diffuser off, it will automatically turn off.

Maintenance
- Turn off the power, unplug the power cord and remove the top cover.
- Pour out the remaining water in the tank. Do not pour from the outlet side.
- Put a few drops of neutral kitchen detergent into warm water to clean the product with a soft rag. Transducer should be kept clean from mineral deposits and other debris for optimal misting. Never use any sharp objects to clean transducer.

After-sales Service
