

Organic Queso de Jalapeño

Zubiata's newest addition is their Organic Queso de Jalapeño. Its color is yellow & similar to that of a dairy-based Velveeta dip. The consistency is creamy and referred to as liquid gold because it's so good.

They use no nuts, no dairy and no soy. Zubiata's delicious queso is the first like it in the country and it tastes JUST LIKE CHEESE. Its base is peppers, onions, garlic, safflower seed oil, lime, jalapeños, cayenne and kosher salt.

This spectacular addition to our line is creamy and thick enough to use just as you would any Velveeta cheese. You can use it in your homemade mac'n'cheese, in your favorite chili con queso dip or even try it out in a cheesy stuffed meatball! Once you start dipping, it's tough to stop.
