

Artisan
**ECO
URBAN**
Direct Doors.com[®]

Single and double doors in six premium primed colours and unique glass designs.

The new series of Artisan Eco Urban doors is inspired by industrial style décor and designer glass doors, the collection consists of the various glazed patterns available in three transparency options to create an ultra contemporary aesthetic.

Available in both single & double door configurations, all have the choice of four premium primed colours; : Cloud White, Mist Grey, Stormy Grey, Shadow Black, Heather Blue and Sage Sky. All these colours can be sent as a sample should you wish to colour match at home. Very on trend, these natural cool & crisp colours add an element of extravagance without the huge price tag to a range of bespoke doors made entirely in the UK.

Warm wood beats cold steel.

Decorating your home is an exciting albeit daunting task. We try to make this as easy as possible for our customers, this is why we have decided to make our own range of stylish Artisan Handmade Bespoke Doors.

Sometimes, standard doors just aren't what you're looking for. Made in the UK, these British designed and made doors are some of the best on the market. We believe that our Artisan Handmade glazed doors are of the highest class, and a wide range of designs will satisfy even the most sophisticated tastes.

Artisan Eco-Urban Doors: Thickness, Stiles & Rails, Core

Rails and Stiles are 90mm*

These heavily dowel jointed solid laminated wood doors are **40mm* thick** and are designed to meet the most demanding quality requirements. Eco-Urban are **British made** industrial style doors, made of sustainable, fast growing European solid laminated timber.

*All dimensions and thicknesses are +/- 2mm.

The supplier of our **solid laminated core** wood for the Eco-Urban door range guarantee the wood is responsibly sourced and 100% FSC compliant.

Door stiles and rails materials are an Eco sustainable solid laminated timber in what is known as a laminated construction, this is when thick sections of timber are laminated to provide a product stronger and more stable than an individual timber section and all from FSC registered and managed forests.

Artisan Designer Eco-Urban Doors: Colour, Finish

Six Premium Primed Colour Options - Samples available.

Premium Primed Finish:

The beauty of the grain may be visible on some of the real wood door material.

All our Eco-Urban products from our Thru brand are meticulously prepared, featuring a premium high-quality primer. These specialized paint materials, developed for us in Germany by the world-renowned paint supplier "Remmers," ensure a superior finish. While we acknowledge that some customers may find the finish satisfactory, applying a topcoat is required before installation, followed by touch-ups as needed.

One point to note is that all primed or painted doors but especially black primed doors will show movement between door rails and panels, the panel will possibly show "shrinkage" in the finish at the edges which will ultimately lead to customers unease, this is not a manufacturing issue, these doors need to be finished on site.

Artisan Designer Eco-Urban Doors: Hinges

The Eco-Urban are bespoke solid timber doors and four hinges are required due to their weight.

Hinges are available at an additional cost.

We suggest setting the hinges as shown in the pictures below:

Artisan Designer Eco-Urban Doors: Sizing

The below are minimum and maximum sizes*

Single Doors:

Width: 600 - 1150mm
Height: 1800-2350mm

Double Doors:

Width: 1200 - 2300mm
Height: 1800-2350mm

*Smaller and larger sizes may be available, please ask for a quote if you need something different for under your staircase etc., we can also supply the full range pre-hinged and as a full frame/door set.

Matching frames are also available and can add additional width and height to the sizes above (see page 24 for more details).

Artisan Designer Eco-Urban Doors: Panel & Glass Options

Panel, Clear Glass & Frosted Glass options are available.

Glass : Toughened 6mm thick (some of the smallest panes may be annealed glass, 6mm).
Panels: 9mm thick moisture-resistant MDF, recessed within the door thickness.

Three glazing options for each design:

- **Clear glass & Opaque design**
- **Opaque glass & Clear design**
- **Opaque glass & Opaque design**

If there is any glass other than those listed above that you would like to order, please contact us and we will provide you with a quote.

Glass:

Rails & Stiles: Solid laminated timber.

Glass: 6mm Toughened glass

Finish: The opaque effect is achieved using a digital print applied permanently to glass.

All doors are beaded on one side.

Obscure Glass with Obscure Design:

The obscure design on obscure background will be a pixelated finish.

Ideal for bedrooms and bathrooms

If fitting in a bathroom or wet room please keep the smooth side of the glass (without the print) to the inside for the cleaning purpose).w

Artisan Designer Eco-Urban Doors: Glazing

Glass supplied with our Handmade Eco-Urban doors conforms to British Standard BS EN 12600

Glazing:

A feature of safety glass is that each pane will have a safety stamp etched within the glass. The style and positioning of this etching varies depending on the manufacturer, most will be visible but some may be discreet or on occasion, they are hidden. This feature is in order to comply with safety building regulations and we, therefore, have no control over the requirement or style.

Safety glass is defined as glass which must have passed an impact test and either must not break or must break safely. The test is intended to classify flat glass products into three principal classes by performance under impact and by mode of breakage.

Characteristics of toughened glass:

Fragmentation

Should the glass break, it will fragment into small pieces with dulled edges, thereby greatly reducing the risk of injury.

Increased resistance to mechanical stresses

Toughened glass offers impact resistance and bending strength up to five times more than annealed glass of the same thickness.

Increased resistance to thermal stresses

It offers greater resistance to thermal stresses than ordinary float annealed glass.

Artisan Designer Eco-Urban Doors: Designs - Door Pairs

Any door pair can be supplied with or without the pairmaker.

If the pairmaker is selected, 12mm will be included in the overall sizes provided by the client.

The pairmaker is supplied loose so you can choose which door opens first when fitting.
Pairmakers finish will match your chosen door pair.

Bespoke Frame Lining kit will suit all doors from our Handmade Eco-Urban Range.

All pre-cut to a set large dimension so they suit multiple door widths and heights, end legs both pre-drilled as is the lintol on one side with a template supplied to allow correct drilling of the other side of the lintol to your chosen width, all for ease of assembly, the pins, screws and caps are supplied but drilling for wall fixing has to be done by you to suit your home or project.

Single And Double Door Frames are available in Six Premium Primed colour options.

Thruframe Bespoke Door Lining Frames are 133x30mm thick with 62mm door stops and are mainly used where there is a timber stud style partition wall or a robust wall to give extra stability, the price is per 6 piece pack including the door stops, to suit one large doorway, sold in kit form.

Door Frame Material: Premium Primed MDF

Multi door discount available.

If you require a colour sample, please get in touch with your supplier.

Delivery

Our standard delivery service is operating for almost all products, albeit some may have slight delays that are subject to change due to supply source issues. Our aim is to dispatch all orders with a minimum of delay.

We provide tailored support and exceptional service, creating a bespoke door experience that makes our clients feel valued and cared for. We aim to build long-term relationships built on trust and mutual respect.
