THRU EASI
ROOM DIVIDERS

Dividing in Style: The Power of Room Dividers.

Re imagine your living space with our stunning Handmade Room Dividers, boasting our one of a kind Eco-Urban doors and elegant full pane glass side screens.

Sustainable Handmade Room Dividers can bring multiple benefits to your home, made from European solid laminated timber, add elegance and maximize floor space. The full pane glass side screens enhance the brightness and openness of your home. We offer standard and bespoke sizes to meet your specific needs and preferences.

Six Premium Primed Colours: Stylish Single and Double Doors with Clear Glass Sidelights.

Introducing our ThruEasi Urban Heritage room divider range, inspired by Industrial and Loft style décor. With bold lines and geometric profiles, our various glass styles create an ultra-contemporary aesthetic.

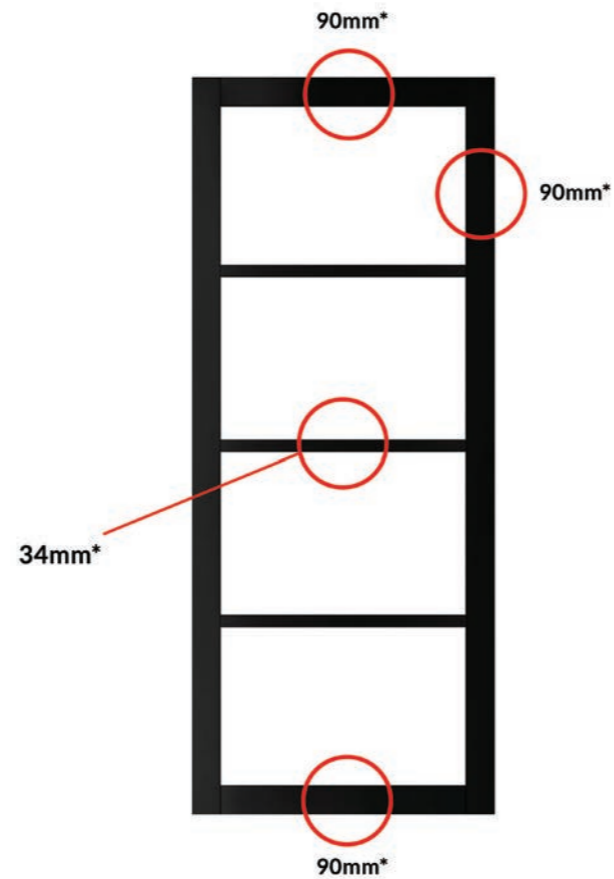

Our ThruEasi sliding doors are available in single or double configurations with clear, frosted, designer, or tinted glass options. Choose from four premium primed colours: Shadow Black, Cloud White, Mist Grey, Stormy Grey, Sage Sky and Heather Blue, designed to enhance the contemporary look of your space.

Eco-Urban Dividers: Thickness, Stiles & Rails, Core

Rails and Stiles are 90mm* Astragals are all nominal 34mm*

These heavily dowel jointed solid laminated wood doors are **40mm* thick** and are designed to meet the most demanding quality requirements. Eco-Urban are **British made** industrial style doors, made of sustainable, fast growing solid laminated timber .

*All dimensions and thicknesses are +/- 2mm.

The supplier of our **solid laminated core** timber for the Eco-Urban door range guarantee the wood is responsibly sourced and 100% FSC compliant.

Door stiles, rails and astragal materials are an Eco sustainable solid laminated timber in what is known as a laminated construction, this is when thick sections of timber are laminated to provide a product stronger and more stable than an individual timber section and all from FSC registered and managed forests, door panels are always 9mm thick moisture resistant MDF.

Eco-Urban Dividers: Colour, Finish

Six Premium Primed Colour Options - Samples available.

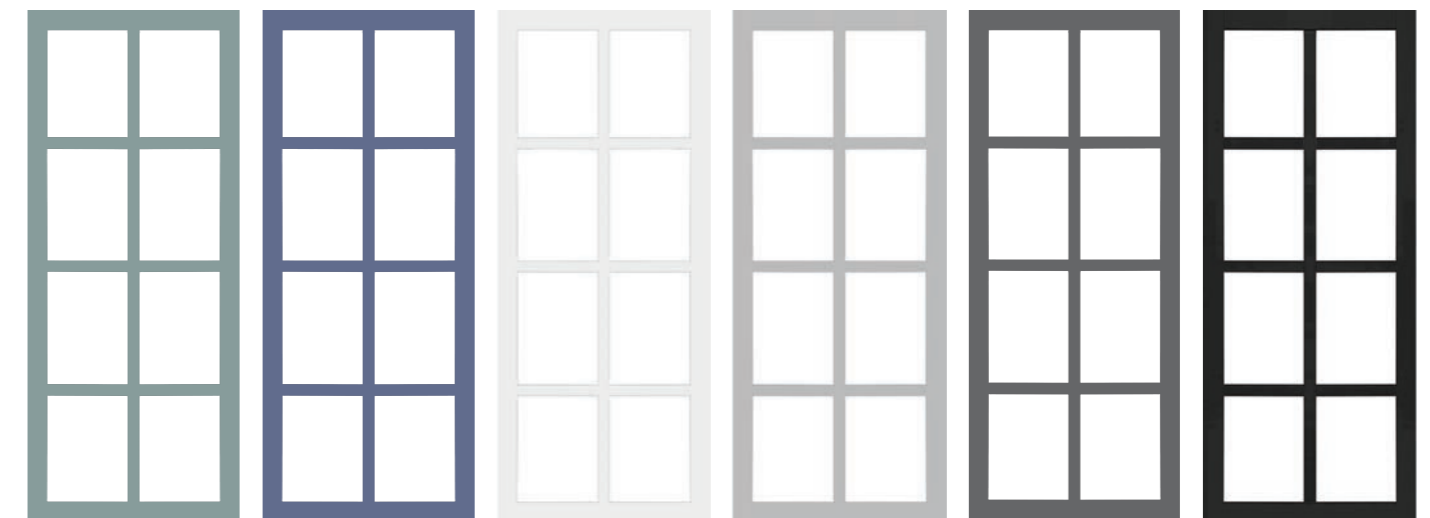

Premium Primed Finish:

The beauty of the grain may be visible on some of the real wood door material.

All our Eco-Urban products from our Thru brand are meticulously prepared, featuring a premium high-quality primer. These specialized paint materials, developed for us in Germany by the world-renowned paint supplier "Remmers," ensure a superior finish. While we acknowledge that some customers may find the finish satisfactory, applying a topcoat is required before installation, followed by touch-ups as needed.

One point to note is that all primed or painted doors but especially black primed doors will show movement between door rails and panels, the panel will possibly show "shrinkage" in the finish at the edges which will ultimately lead to customers unease, this is not a manufacturing issue, these doors need to be finished on site.

Eco-Urban Dividers: Sizing

Single Door - Single Side

838mm Door - 301mm Side, 2018mm High x 1237mm Wide Overall
838mm Door - 529mm Side, 2018mm High x 1465mm Wide Overall

Glazed Doors:

Rails & Stiles: Solid laminated timber.

Glass: All doors except Baltimore will be 4mm Toughened glass, some of the smallest panes may be 4mm annealed glass, Baltimore doors are glazed with 6mm thick glass.

Finish: Premium Primed

Eco-Urban Dividers: Glazing

Glass supplied with our Handmade Eco-Urban doors conforms to British Standard BS EN 12600

Glazing:

A feature of safety glass is that each pane will have a safety stamp etched within the glass. The style and positioning of this etching varies depending on the manufacturer, most will be visible but some may be discreet or on occasion, they are hidden. This feature is in order to comply with safety building regulations and we, therefore, have no control over the requirement or style (annealed glass will not have a safety stamp).

Safety glass is defined as glass which must have passed an impact test and either must not break or must break safely. The test is intended to classify flat glass products into three principal classes by performance under impact and by mode of breakage.

Characteristics of toughened glass:

Fragmentation

Should the glass break, it will fragment into small pieces with dulled edges, thereby greatly reducing the risk of injury.

Increased resistance to mechanical stresses

Toughened glass offers impact resistance and bending strength up to five times more than annealed glass of the same thickness.

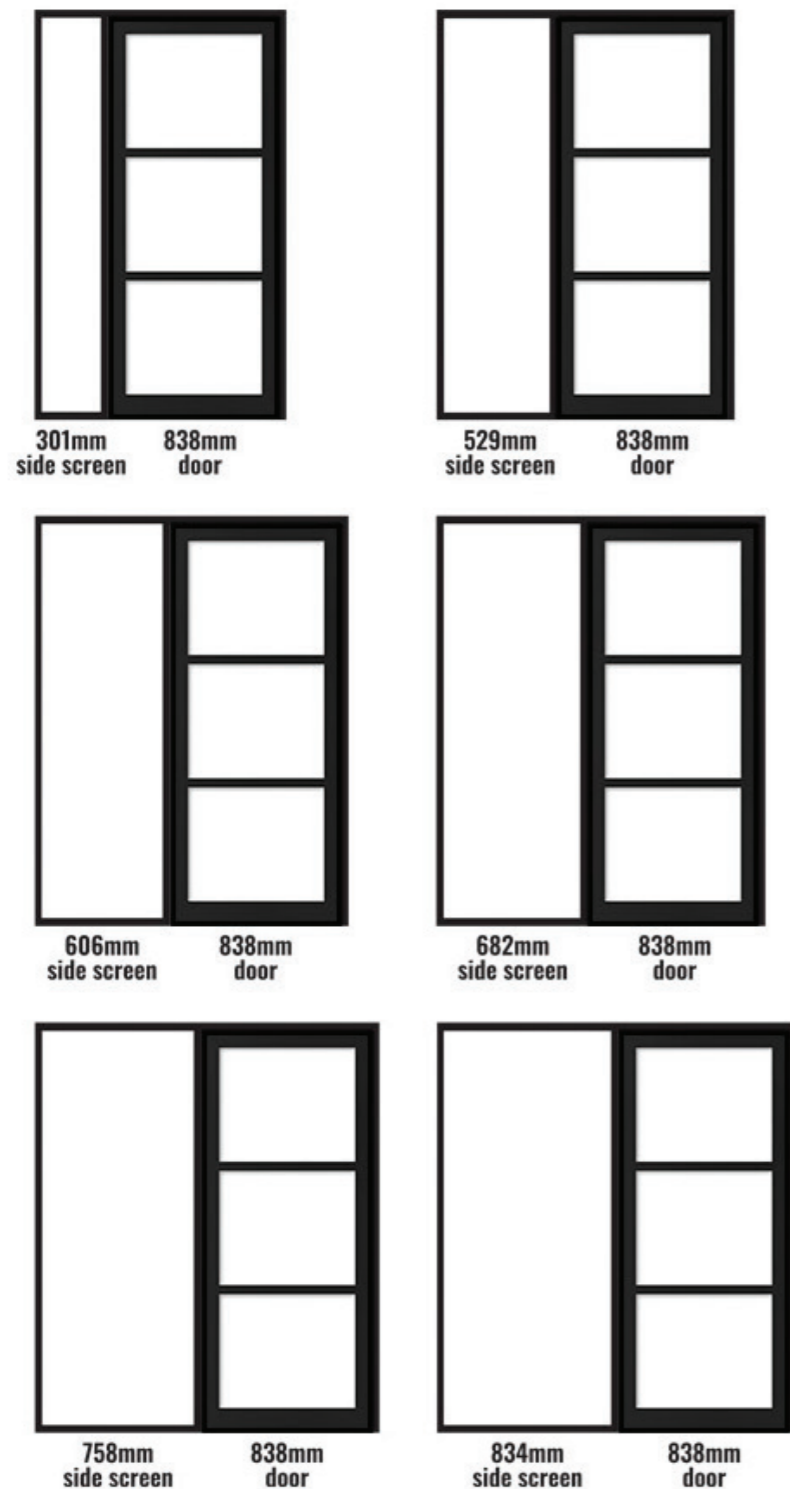

Increased resistance to thermal stresses

It offers greater resistance to thermal stresses than ordinary float annealed glass.

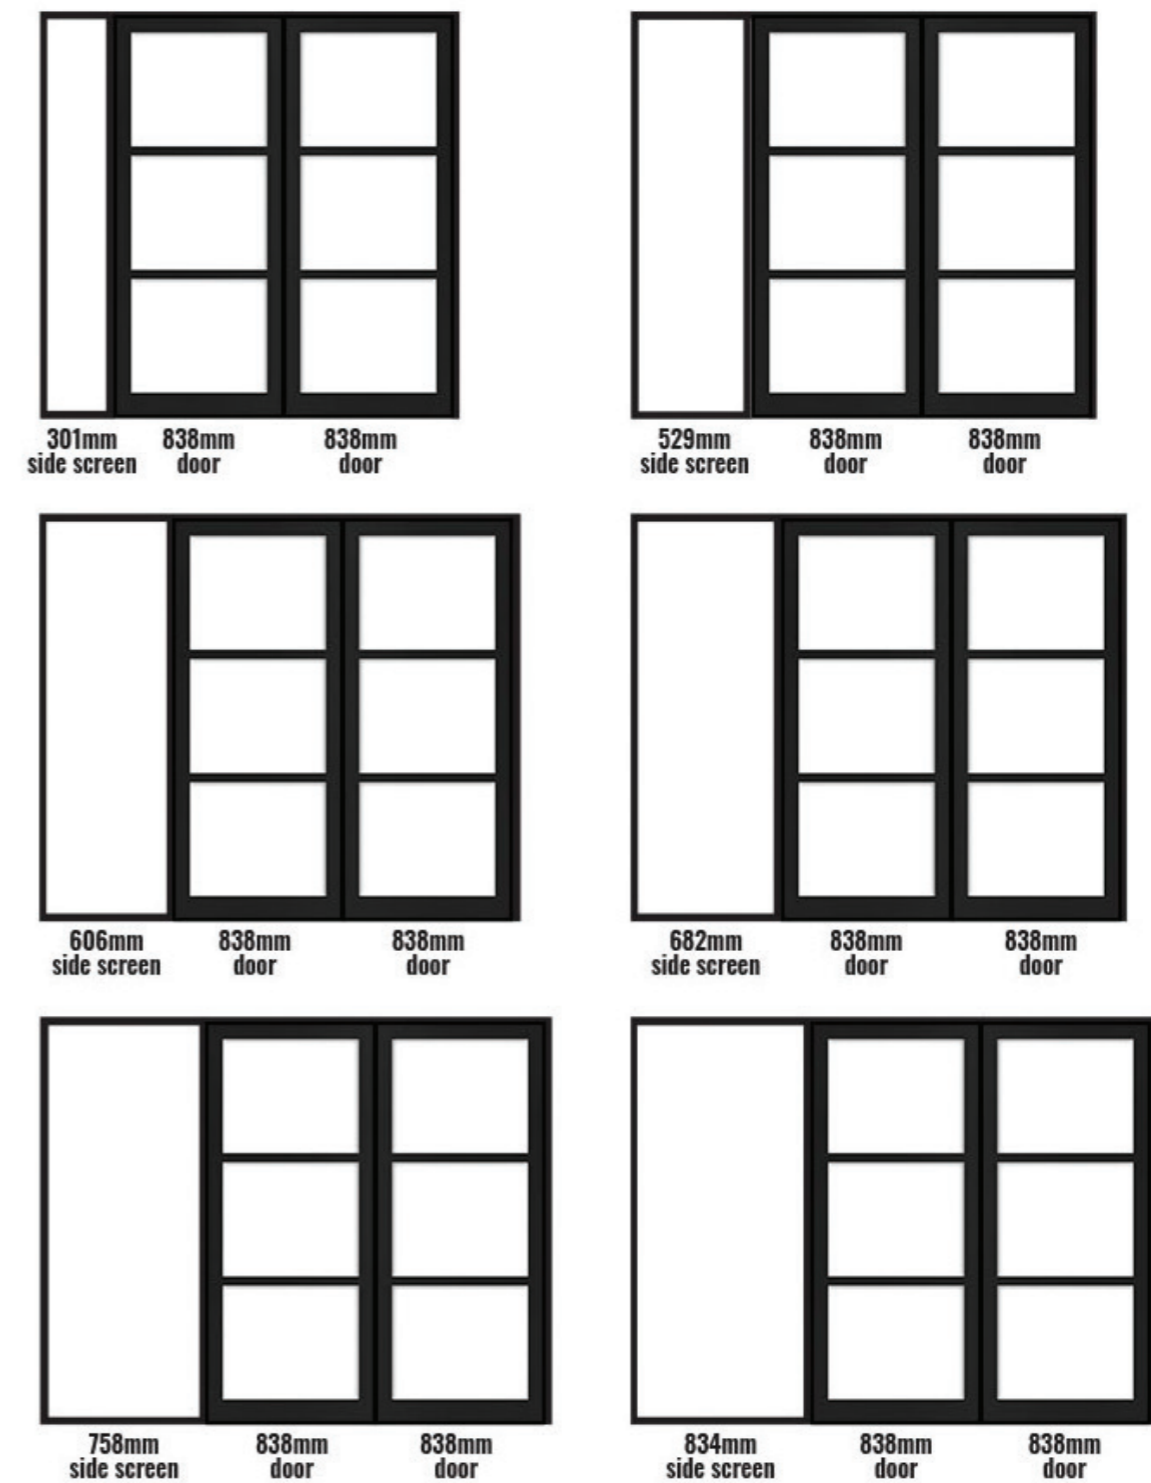

Eco-Urban Dividers: Configuration

Depending on the version and size chosen, the proportion of doors will vary, refer to the examples for the one door, one sidescreen configuration:

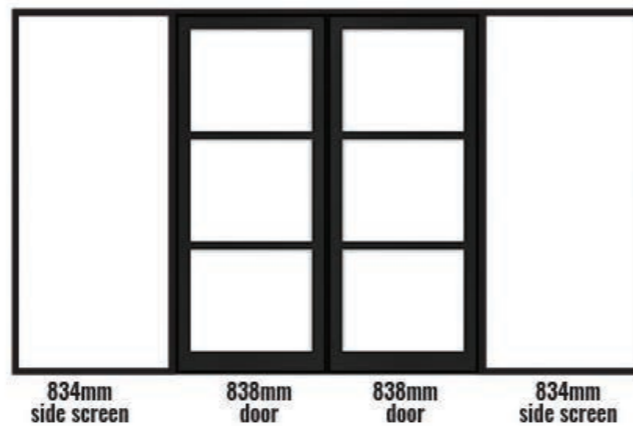

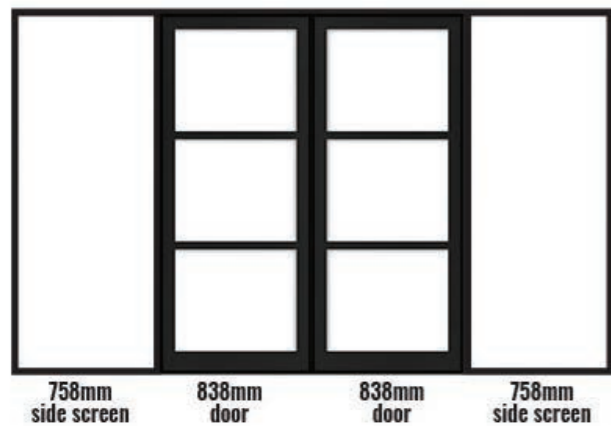

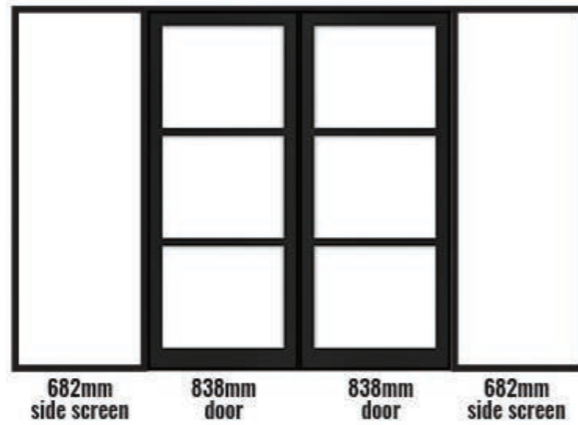

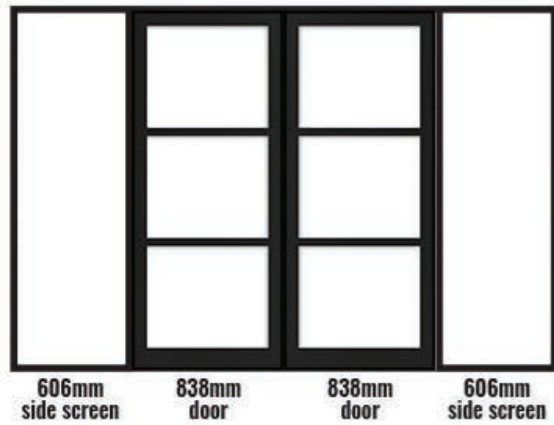

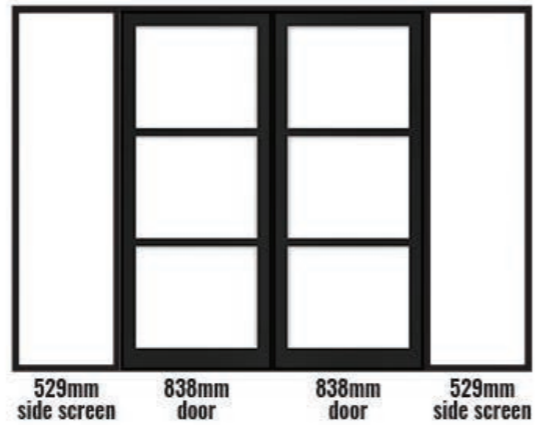

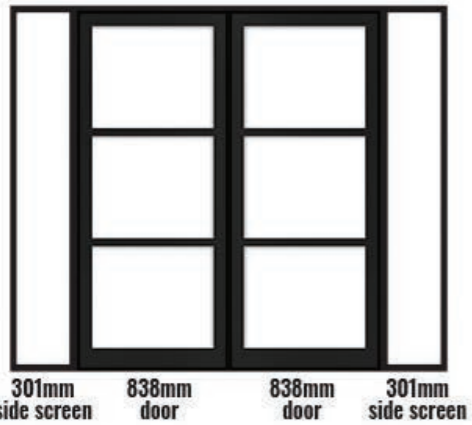

Eco-Urban Dividers: Configuration

Examples for the two door, one sidescreen configuration are presented below:

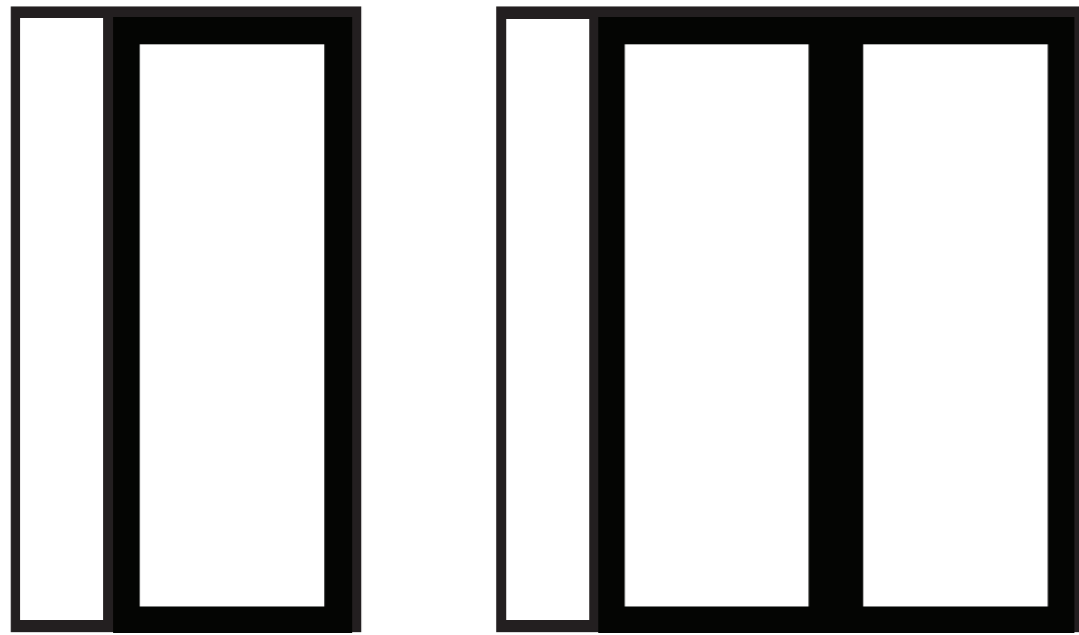

Eco-Urban Dividers: Configuration

Examples for the two door, two sidescreens configuration are presented below:

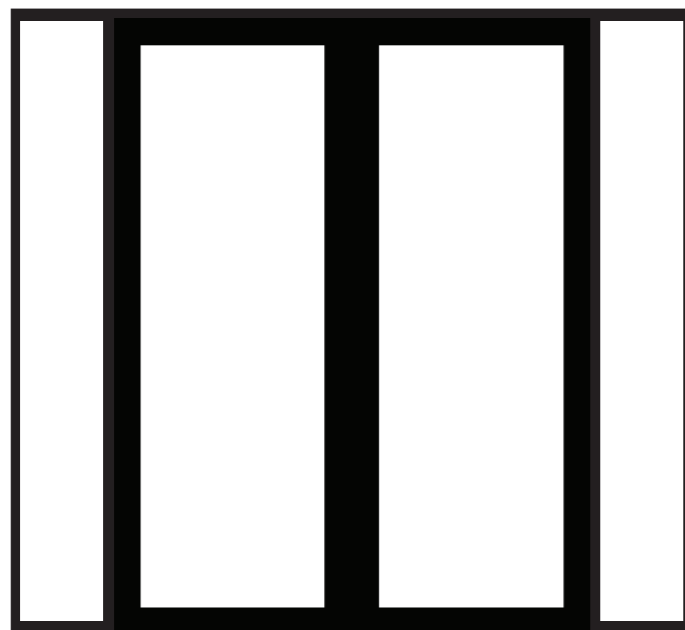

All door designs listed are available in both standard and bespoke sizes for the 1-1, 2-1, and 2-2 variations.

Eco-Urban Dividers: Samples & Offer

Multi door discount available.

If you require a colour sample, please get in touch with your supplier.

Eco-Urban Dividers: Door Pairs - Pairmaker

Any door pair can be supplied with or without the pairmaker.

If the pairmaker is selected, 12mm will be included in the overall sizes provided by the client.

The pairmaker is supplied loose so you can choose which door opens first when fitting.
Pairmakers finish will match your chosen door pair.

Eco-Urban Dividers: Handles Available

A range of ironmongery to suit our Eco-Urban single and double doors.

Delivery

Our standard delivery service is operating for almost all products, albeit some may have slight delays that are subject to change due to supply source issues. Our aim is to dispatch all orders with a minimum of delay.

We provide tailored support and exceptional service, creating a bespoke door experience that makes our clients feel valued and cared for. We aim to build long-term relationships built on trust and mutual respect.
