INSIDE WALLS

Six Premium Primed Colours: Stylish Single and Double Sliding Doors

Introducing our latest Eco-Urban Heritage door range - a collection inspired by Industrial and Loft style décor. Our pocket doors feature bold lines and geometric profiles with a variety of panel and glass styles for an ultra-contemporary aesthetic. Available in both single and double configurations, our Eco-Urban pocket doors come in clear, frosted, designer, and tinted glass options with four premium primed colour choices: Shadow Black, Cloud White, Mist Grey, Stormy Grey, Sage Sky and Heather Blue. Unsure which colour to choose? We offer color samples for you to match to your space.

In addition to our Eco-Urban Pocket Heritage door range, we also offer a stunning collection of Artisan Glass pocket doors. Our Artisan Glass pocket doors are available in a range of styles and finishes, including frosted glass with clear design, clear glass with frosted design, and fully opaque options, making them perfect for use in bathrooms. Designed and made in the UK, our Artisan Glass pocket doors are the one and only of their kind, adding a touch of sophistication and elegance to any space.

Luxury Meets Functionality: Handmade Pocket Doors

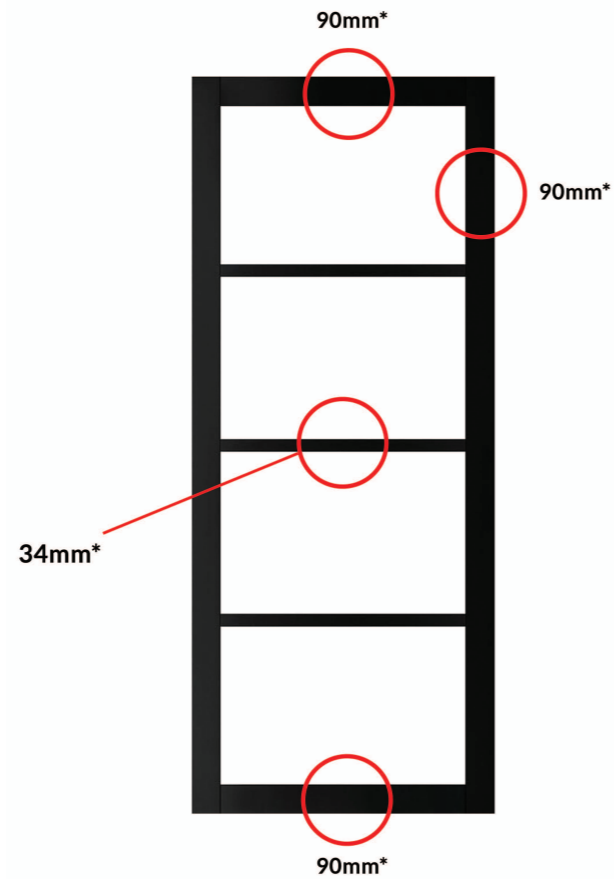

Introducing our Handmade Pocket Doors - a one-of-a-kind addition to any stylish and sophisticated interior. Made from sustainably sourced European solid laminated timber, our Eco-Urban Pocket Doors not only add a luxurious touch to your space, but also save valuable floor space. With the option for both standard and bespoke sizes, our doors are tailored to meet your individual needs and preferences. Choose our Handmade Pocket Doors for a unique and eco-friendly addition to your home, and elevate your interiors to new levels of elegance and practicality.

Handmade Eco-Urban Pocket Doors: Details

Rails and Stiles are 90mm* Astragals are all nominal 34mm*

These heavily dowel jointed solid laminated wood doors are **40mm* thick** and are designed to meet the most demanding quality requirements. Eco-Urban are **British made** industrial style doors, made of sustainable, fast growing solid laminated timber .

*All dimensions and thicknesses are +/- 2mm.

The supplier of our **solid laminated core** timber for the Eco-Urban door range guarantee the wood is responsibly sourced and 100% FSC compliant.

Door stiles, rails and astragal materials are an Eco sustainable solid laminated timber in what is known as a laminated construction, this is when thick sections of timber are laminated to provide a product stronger and more stable than an individual timber section and all from FSC registered and managed forests, door panels are always 9mm thick moisture resistant MDF.

Handmade Eco-Urban Pocket Doors: Colour, Finish

Six Premium Primed Colour Options - Samples available.

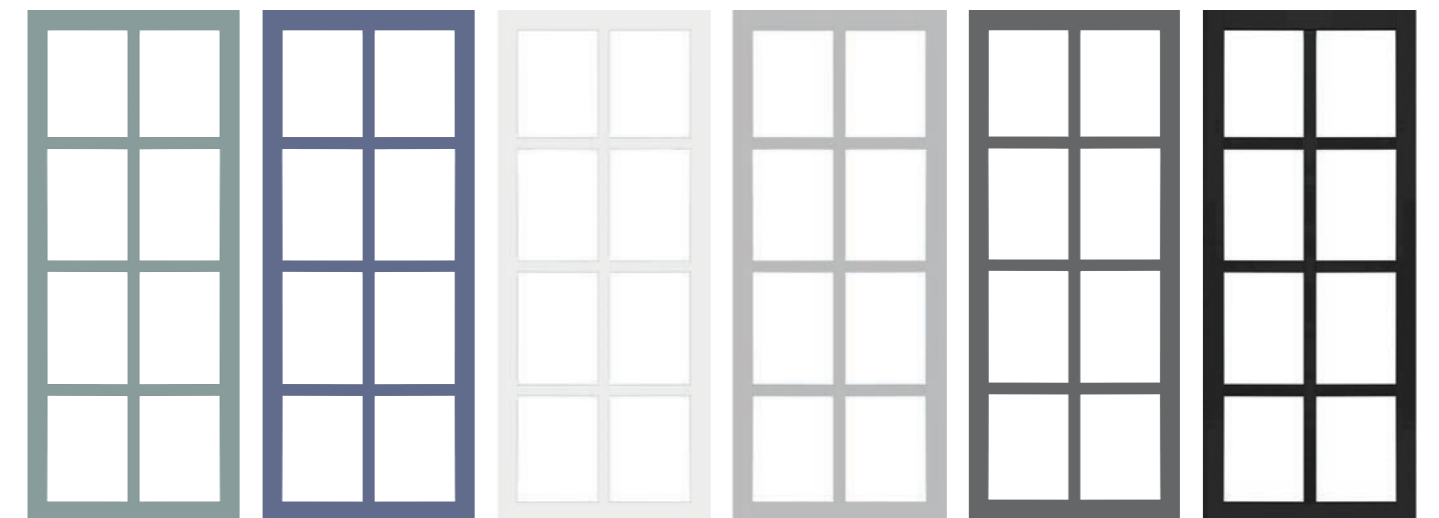

Premium Primed Finish:

The beauty of the grain may be visible on some of the real wood door material.

All our Eco-Urban products from our Thru brand are meticulously prepared, featuring a premium high-quality primer. These specialized paint materials, developed for us in Germany by the world-renowned paint supplier "Remmers," ensure a superior finish. While we acknowledge that some customers may find the finish satisfactory, applying a topcoat is required before installation, followed by touch-ups as needed.

One point to note is that all primed or painted doors but especially black primed doors will show movement between door rails and panels, the panel will possibly show "shrinkage" in the finish at the edges which will ultimately lead to customers unease, this is not a manufacturing issue, these doors need to be finished on site.

Handmade Eco-Urban Pocket Doors: Sizing

Available Bespoke and in standard imperial and metric UK door sizes.

Single Pocket Doors sizes available:

2060x1290mm Wide/1981x610mm Door

Glazed Doors:

Rails & Stiles: Solid laminated timber.

Glass: All doors except Baltimore will be 4mm Toughened glass, some of the smallest panes may be 4mm annealed glass, Baltimore doors are glazed with 6mm thick glass.

Finish: Premium Primed

Handmade Eco-Urban Pocket Doors: Glazing

Glass supplied with our Handmade Eco-Urban doors conforms to British Standard BS EN 12600

Glazing:

A feature of safety glass is that each pane will have a safety stamp etched within the glass. The style and positioning of this etching varies depending on the manufacturer, most will be visible but some may be discreet or on occasion, they are hidden. This feature is in order to comply with safety building regulations and we, therefore, have no control over the requirement or style (annealed glass will not have a safety stamp).

Safety glass is defined as glass which must have passed an impact test and either must not break or must break safely. The test is intended to classify flat glass products into three principal classes by performance under impact and by mode of breakage.

Characteristics of toughened glass:

Fragmentation

Should the glass break, it will fragment into small pieces with dulled edges, thereby greatly reducing the risk of injury.

Increased resistance to mechanical stresses

Toughened glass offers impact resistance and bending strength up to five times more than annealed glass of the same thickness.

Increased resistance to thermal stresses

It offers greater resistance to thermal stresses than ordinary float annealed glass.
