Space-Saving Luxury

Upgrade your home decor with our exclusive range of Handmade Sliding Doors crafted using sustainably sourced European solid laminated timber.

Our Eco-Urban Sliding doors are designed to save space while adding a luxurious touch to your interiors. Available in both standard and bespoke sizes, our doors are tailored to meet your individual needs and preferences, making them the perfect addition to your stylish and sophisticated interiors.

Six Premium Primed Colours: Stylish Single and Double Sliding Doors

Introducing our latest Thru-Slide Urban Heritage sliding door range, inspired by the Industrial and Loft style décor, featuring numerous styles that use panels and different glass styles combined with bold lines and geometric profiles to create an ultra-contemporary aesthetic.

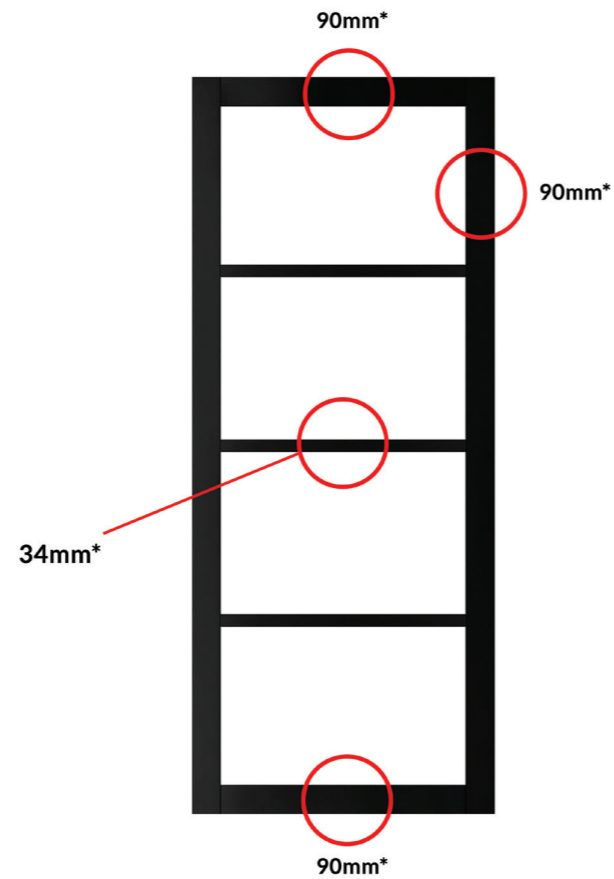

Our Eco-Urban sliding doors are available in both single and double configurations, with a range of panelled and glazed styles in clear, frosted, designer and tinted glass options. You can choose from six premium primed colours: Cloud White, Mist Grey, Stormy Grey, Shadow Black, Heather Blue and Sage Sky. Not sure which colour to choose? We offer samples of all four colours so you can colour match in the comfort of your own home.

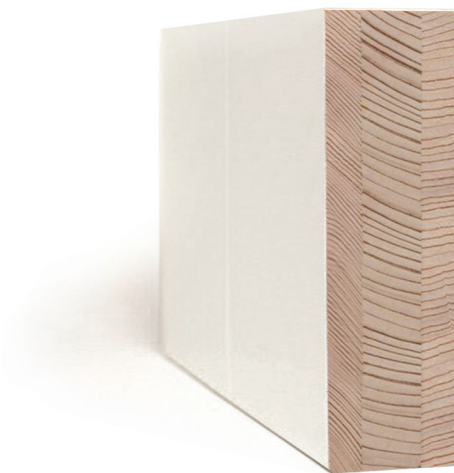

THRU-SLIDE Eco-Urban Doors: Thickness, Stiles & Rails, Core

Rails and Stiles are 90mm* Astragals are all nominal 34mm*.

These heavily dowel jointed solid laminated wood doors are **40mm* thick** and are designed to meet the most demanding quality requirements. Eco-Urban are **British made** industrial style doors, made of sustainable, fast growing solid laminated timber .

*All dimensions and thicknesses are +/- 2mm.

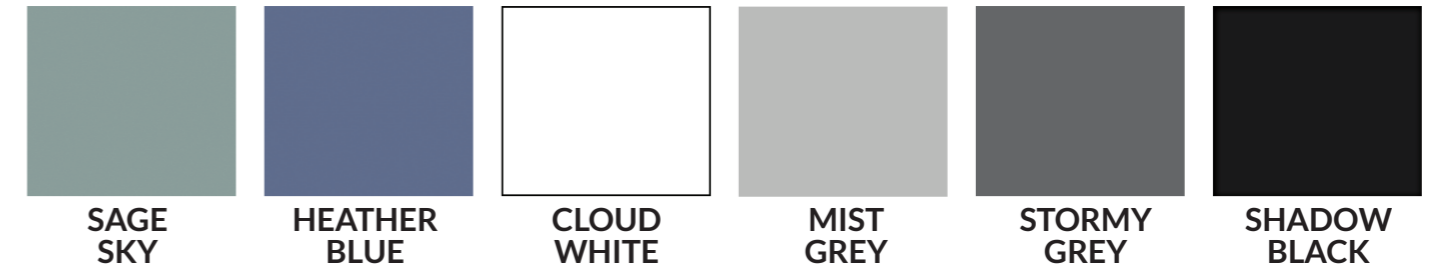

The supplier of our **solid laminated core** timber for the Eco-Urban door range guarantee the wood is responsibly sourced and 100% FSC compliant.

Door stiles, rails and astragal materials are an Eco sustainable solid laminated timber in what is known as a laminated construction, this is when thick sections of timber are laminated to provide a product stronger and more stable than an individual timber section and all from FSC registered and managed forests, door panels are always 9mm thick moisture resistant MDF.

THRU-SLIDE Eco-Urban Doors: Colour, Finish

Six Premium Primed Colour Options - Samples available.

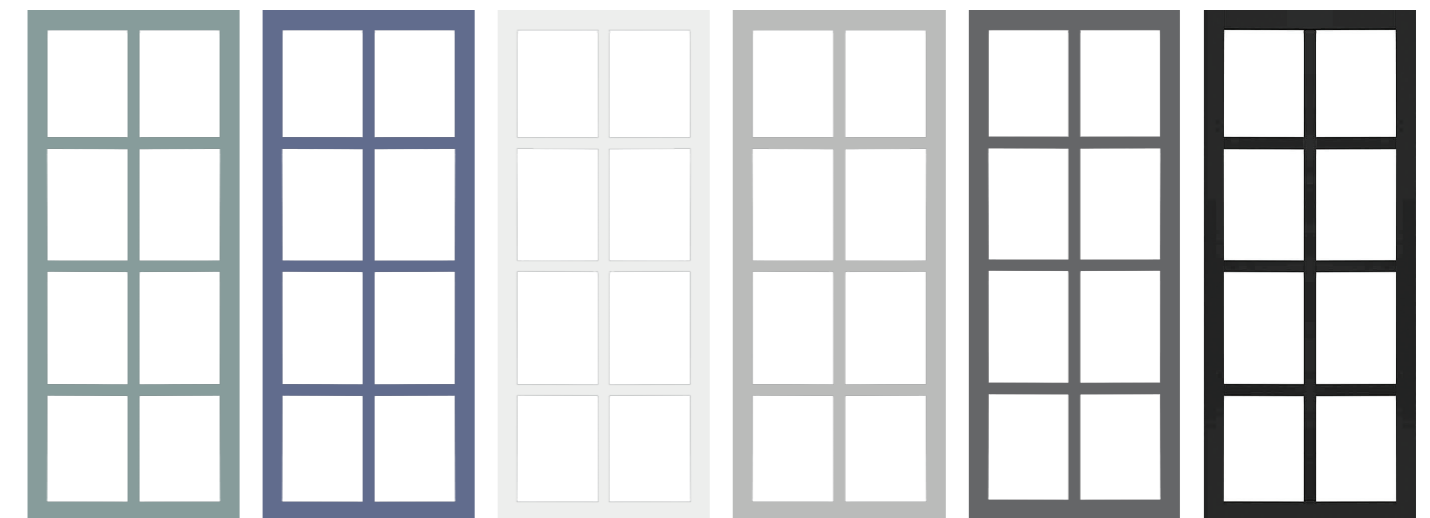

Premium Primed Finish:

The beauty of the grain may be visible on some of the real wood door material.

All our Eco-Urban products from our Thru brand are meticulously prepared, featuring a premium high-quality primer. These specialized paint materials, developed for us in Germany by the world-renowned paint supplier "Remmers," ensure a superior finish. While we acknowledge that some customers may find the finish satisfactory, applying a topcoat is required before installation, followed by touch-ups as needed.

One point to note is that all primed or painted doors but especially black primed doors will show movement between door rails and panels, the panel will possibly show "shrinkage" in the finish at the edges which will ultimately lead to customers unease, this is not a manufacturing issue, these doors need to be finished on site.

THRU-SLIDE Eco-Urban Doors: Tracks

Tracks Available

With our selection of sliding door tracks, you can choose the style that best suits your needs and design idea. Explore our collection today and elevate the look and functionality of your space with our top-quality sliding door tracks.

For those who favour a rustic and industrial vibe, we offer the barn style black track. The black matte finish is sleek and stylish, adding character and charm to any space. Its sturdy construction also ensures a secure and smooth sliding operation for your door.

The top mounted stainless steel barn track that is perfect for larger and heavier doors. The track's unique design adds a modern and industrial touch, creating a visually striking statement in your space. Its robust construction guarantees the safety and security of your door.

The tubular sleek stainless steel track, which is perfect for those who prefer a modern and elegant aesthetic. The stainless steel finish not only adds a touch of sophistication to your space but also ensures the durability and longevity of the track.

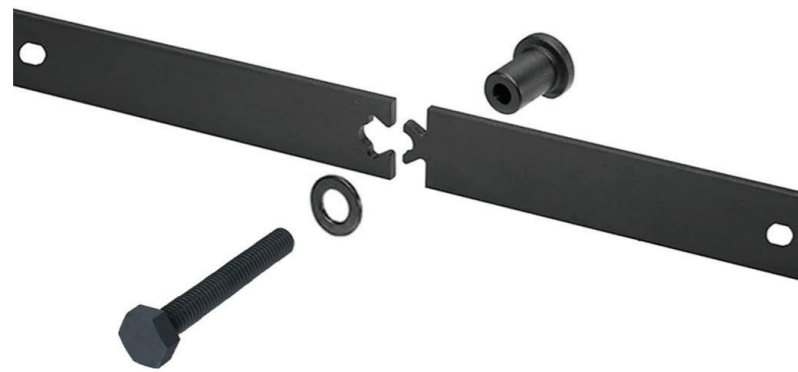

Elevate your home's style with our premium sliding door tracks. Designed for both aesthetics and functionality, our high-quality sliding door systems add elegance and sophistication to any space. Browse our selection to upgrade your home today.

THRU-SLIDE Eco-Urban Doors: Tracks

Flat Bar Tracks

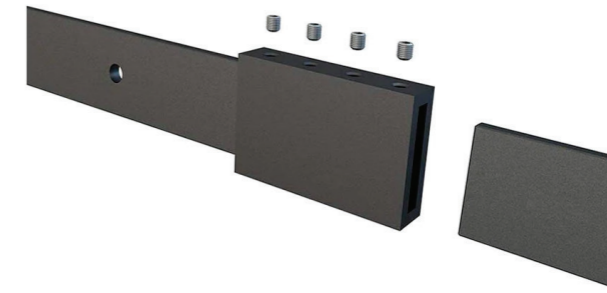

Our Top Mounted and Barn Style Track bars, available in both black and stainless steel finishes, will be supplied in two sections that require assembly. Please use only the screws, plugs, and washers provided to fix them securely.

THRU-SLIDE Eco-Urban Doors: Tracks

Double Doors Track Joint Bracket

Each double door system is supplied with a joint bracket that connects the two brackets into one. Our high-quality joint bracket boasts a smooth finish that ensures a seamless connection between the tracks, further enhancing the overall look and feel of the sliding door system. You can rely on us to provide you with the best quality joint bracket for all your sliding door needs.

Glazed Doors:

Rails & Stiles: Solid laminated timber.

Glass: All doors except Baltimore will be 4mm Toughened glass, some of the smallest panes may be 4mm annealed glass, Baltimore doors are glazed with 6mm thick glass.

Finish: Premium Primed

THRU-SLIDE Eco-Urban Doors: Glazing

Glass supplied with our Handmade Eco-Urban doors conforms to British Standard BS EN 12600

Glazing:

A feature of safety glass is that each pane will have a safety stamp etched within the glass. The style and positioning of this etching varies depending on the manufacturer, most will be visible but some may be discreet or on occasion, they are hidden. This feature is in order to comply with safety building regulations and we, therefore, have no control over the requirement or style (annealed glass will not have a safety stamp).

Safety glass is defined as glass which must have passed an impact test and either must not break or must break safely. The test is intended to classify flat glass products into three principal classes by performance under impact and by mode of breakage.

Characteristics of toughened glass:

Fragmentation

Should the glass break, it will fragment into small pieces with dulled edges, thereby greatly reducing the risk of injury.

Increased resistance to mechanical stresses

Toughened glass offers impact resistance and bending strength up to five times more than annealed glass of the same thickness.

Increased resistance to thermal stresses

It offers greater resistance to thermal stresses than ordinary float annealed glass.
