What is Paint 'N' Peel®

Paint 'N' Peel® is a system designed to make sealing, staining or painting your door a quick and easy procedure.

Step One

Paint or stain the door as directed by the finishing instructions. The film over the glass protects against streaks, runs or splashed.

Step Two

When the finish is complete, simply, by using a craft knife, cut around the glass aperture ensuring the masking film is cut in the corners.

Step Three

Peel off the film from the glass surface—leaving a smooth edge to the finish, and pristine glass.

We have a wide range of doors with the Paint 'N' Peel® system, designed to make sealing, staining and painting a quick and easy procedure.
