REGULAR Dose (0.25 mg X 1 lb bodyweight): For daily health and wellness, boost immune function, old age, allergies, minor skin conditions, stimulate appetite, minor stress & anxiety, digestive issues & nausea, moderate arthritis & joint inflammation, minor aches, and pains.

STRONG Dose(0.5 mg X 1 lb bodyweight): Chronic pain, severe arthritis & joint inflammation, mobility issues, epileptic seizures, cancer-related symptoms, tumors, severe anxiety, extreme nausea, and vomiting.

Dosing Frequency: Every 8 hours or as needed, 1-3 servings daily. To control anxiety, give 30 minutes before high stress situations (i.e. loud weather, trips to the vet, meeting new people, etc). **Remember that these are just recommendations!** Every pet is different and you will have to take some time figuring out what dosage works best for your animal.
