

LED Indications

Connect with Suitable charging source. The indicator shows charging condition as follow:

Power Level	LED-1 (White)	LED-2 (White)	LED-3 (White)	LED-4 (White)	LED-5* (Green, QC/PD Mode)
0-25%	Blinking	OFF	OFF	OFF	ON
25-50%	ON	Blinking	OFF	OFF	ON
50-75%	ON	ON	Blinking	OFF	ON
75-100%	ON	ON	ON	Blinking	ON
Fully Charged	ON	ON	ON	ON	ON
Charging Error	Blinking	Blinking	Blinking	Blinking	OFF

*Note: Fifth LED (Green Color) will glow only when Power Bank is used on QC/PD parameters. Green LED indicator light to show fast charging status.

Safety Information & Precautions

- Keep your device dry. Never place your device in water to avoid causing internal short-circuit, over-heating,
- smoking, fire, deformation, or even explosion of the battery. Do not touch the device if your hands or feet are wet. Store and charge your device in a cool and ventilated place.
- Do not store or charge your device in very hot or very cold areas. Extreme temperatures can damage the device and
- reduce the charging capacity of the battery. It is recommended to use your device at temperatures from 41 to 95 degrees Fahrenheit (5 to 35 degrees Celsius).
- with metal objects, such as coins, keys, and necklaces.

- Do not store your device near strong magnetic fields. Your device may malfunction or the battery may discharge from exposure to magnetic fields.
- Keep your device out of reach of small children to prevent danger.
- Always comply with regulations for battery disposal to avoid causing explosion and/or pollution.
- Do not use damaged power cords or plugs, or loose electrical sockets.
- Recharge using only standard 5V USB chargers, such as wall chargers, car chargers, or computer USB ports. If you use an incompatible adapter, the built-in battery may not be charged fully or be damaged.
- Use only Qi-standard conforming wireless receivers to connect with the transmitting terminal.
- Please stop using your device immediately if it bulges, leaks, or smells, and contact the Manufacturer for service.

Product Overview

At a Glance:-

- Input/Output - 22.5W power rating.
- Qi Enabled 10W Fast wireless charging.
- QC 3.0/PD 2.0 Technology support.
- 6 LED indicators (Four White & Two Green)
- VOOC and DASH Supported.
- 10000mAh Lithium Polymer Battery.
- Click On/Off Power key.
- Suction Cup Design.

Technical Specifications

Model	: PW-38
Cell Capacity	: 10000mAh
Input Micro	: 5V/2.1A, 9V/2.0A, 12V/1.5A
Input Type-C	: 5V/2.6A, 9V/2.0A, 12V/1.5A
Input Port	: 1x Micro USB, 1x Type C
Input Wattage	: 18W
USB A Output 1	: 5V/2.1A, 9V/2A, 12V/1.5A
USB A Output 2	: 5V/4.5A, 9V/2A, 12V/1.5A
USB C Output 3	: 5V/3.0A, 9V/2A, 12V/1.5A
Output Wattage	: 22.5W (max)
PD Output Wattage	: 18W (max)
Wireless Output	: 5V / 1A, 9V/1.1A
Wireless Wattage	: 10W (max)
Output Ports	: 2x USB A, 1x Type C, 1x Qi
Charging Time	: Up to 6-7 hours via 13W, Upto 4 hours via QC/PD 18W, Upto 3 hours via 22.5W
Cell Type	: Li-polymer
Charging Efficiency	: >85% for wired charging; >70% for wireless charging
Wireless Distance	: Up to 6mm
Qi Compatibility	: Any Qi-Enabled Device
USB Compatibility	: Compatible with Smartphones, Tablets & Other similar devices.
Dimensions (LxWxH)	: 140.6 x 68.7 x 17.4 mm
Weight	: 215gm (approx)

Operating Instructions

Checking the Battery Health Status

- Press the power button and the set of LEDs corresponding to the current charge level will begin to flash. When the Power Bank is completely drained and needs to be recharged, the lights will stay off.

How to Charge Your Device?

Wired Mode

- Plug in the 30mm cable and connect it with the USB output port. It is recommended to use USB1 port for android devices and USB2 for Apple devices. Both the ports are capable of charging 3.5A current or higher.
- LED indicators will start blinking to ensure charging has been started.

Wireless Mode

- Compatible with the Qi enabled devices, you just need to place your device on the wireless charging pad. Silicone suction cup will hold your device.
- Always make sure that the device should be connected from the top edge. Though the charging will start on its own but in case it didn't get started, press the power button.
- To notify that charging is in process, green light will start blinking.
- If the power bank is kept idle, it will turn off automatically after 20 seconds.

Note: Wireless and Wired Charging Parameters can work Simultaneously but if one Device is Connected with QC/PD/VOOC mode and after Connecting Second Device with the Power Bank then both devices will charge on normal mode i.e. 5V and Current will be Divided Into The Two/Three Devices.

How to Recharge your Power Bank?

- Before using power bank, ensure that power bank is 100% charged.
- Connect one end of USB wire to power bank on any of the port and connect the other end of wire to charging adapter.
- While charging, green light will be blinking. Once the power bank is fully charged (100%), 4 white LED indicator will display and stop blinking. Now, you can disconnect the cable from the power bank.
