Shopify Developer (m/w/d)

👵 About Tante-E

We are one of the leading Shopify Plus agencies in Germany. We build and optimize online stores for brands like Krombacher, Kapten & Son, 3bears or vly. We merge the ideals of the small corner stores and the modern e-commerce world and help retailers to stand their ground against Amazon & Co. and we get the best out of their online store and products.

🕵️ That' s why we are looking for you

Developing creative solutions and thinking beyond standard approaches are your thing? Then apply now! As a Shopify Developer you will work on the stores of our closest customers, with whom we have a long-term and continuous cooperation. This is why we're looking for you as a Shopify Developer who has an experience working on Shopify platform to:

➔ Develop (a) custom development, and (b) using existing Shopify templates.
➔ Translate design mock-ups (such as Figma) into fully functioning solutions.
➔ Modify + update existing pages to implement new features and further improve the UI/UX build.

📦 What you bring

- You have a degree in the field of information technology and already have

  2-4 years of work experience.
- You have demonstrable expertise with HTML5, CSS3, and JavaScript, with an in-depth understanding of DOM.
- You have experience with vanilla JavaScript, jQuery, ES2015/ES6 and modern JavaScript frameworks.
- You are a ninja 🥷 when it comes to converting graphic layout to web page with pixel perfect implementation.
- Experience developing for responsive layouts for a desktop, tablet, and mobile
- You know your way around version control systems, especially Github.
- You have a very good command of written and spoken German and/or English.
- **1-3 years of experience with Shopify**'s theming system and Liquid templating.
- Experience with implementing/debugging 3rd party Shopify apps, creating custom solutions is a plus.
- Testing and debugging skills with browser console and cross platforms tools
- Experience with Shopify's object/properties, AJAX API, and Meta fields

🏗️ Your tasks

- Implementation of design templates in the frontend.
- Integration of flexibility in the online store via Theme Editor, Metafields or similar.
- Implementation of functionalities such as configurators, discount structures, etc.
- Connection and integration of tools via API.

- Optimized integration of the Shopify tech stack.
- Troubleshooting and bugfixing.
- Consulting on feasibility of specific implementations.

💡 **What we offer you**
- Intensive training on shopify as a platform and shopify liquid.
- An exciting and challenging position with a lot of creative freedom in a fast-growing agency in Germany.
- A high degree of personal responsibility from the very beginning and a steep learning curve, regular feedback sessions as well as knowledge sharing sessions and training.
- Varied tasks and a young, dynamic team that ensures a pleasant working atmosphere.
- Latest hardware and the possibility to work from home office and/or office.
