CARTON OVERWRAPPER 3000

- Touchscreen HMI Interface
- Quick and Easy Product Changeover
- Variable speed of up to 50 ppm
- Clear view Guarding for 360 degree viewing of the machine
- Auto aligning of wrapping material
- Diagnostic system
- Plain or printed wrapping material
- Optional tear tape unit
- Increased component life in comparison to CAM driven systems
- Minimum maintenance
- Diagnostic fault find system

Our premier film overwrapping machine is the **Carton Overwrapper 3000** (Servo Driven Film Overwrapper), a fully automatic, computer-controlled, servo-driven system capable of giving unmatched product flexibility and finish quality. Capable of overwrapping up to 50 products a minute, this machine has proved itself to be an indispensable asset to companies that require an envelope fold finish as well as a reliable and flexible machine.

The **Carton Overwrapper 3000** can be customised to use either plain or printed wrapping material as well as having the option of a tear tape unit which allows easy opening of products by consumers.

Our computer controlled **Carton Overwrapper 3000** gives the operator the option of saving product settings which allows for quicker product calibration and quicker product changeovers.
