CP3000 PLEAT SOAP WRAPPING MACHINE

Features

- Speeds of 40-50 product per minute
- Fully Automatic
- Seals pleats with an adhesive label
- Pleated Wrap finish
- Utilises a variety of wrapping materials
- Interlocking guarding system

The **CP3000** is the latest in our range of soap wrapping machines, producing a pleated wrap. The machine has been specifically designed for the soap wrap market where a high quality finish and presentation is required to increase sales appeal. The machine is customized to suit the client's specification.

The machine can be changed over to suit various product sizes at speeds of 40-50 products per minute.

The machine can be directly fed from an automatic system straight onto the in feed belt or can be manually fed onto the in feed belt by a single operator.

**WORLD-LEADING PACKAGING MACHINERY
DESIGNED & BUILT IN THE UK**
