### Features

- Impulse Heating System
- Automatic Maglocks
- Adjustable Sealing Table and Film Feed
- Single-Phase Power
- Spring-Loaded Sealing Edges
- 380mm Square Seal Area
- Powder-Coated Finish
- NEW – Optional Discharge Conveyor

The CPS38 L-Sealer is a state-of-the-art update to our L-Sealer series. With features such as adjustable film feed, in-feed table and sealing height, time-adjustable impulse heating and a semi-automatic sealing process, this machine is a modern take on a classic packaging system.

The CPS38 L-Sealer is a perfect option for small-scale packaging jobs that require a film seal. Simplicity of operation is paramount in our design, and the machine requires minimal training to be used effectively. Electro-magnetic sealing locks remove the need for guesswork and provide a perfect seal every time. The machine is fully adjustable to your product requirements, with a movable film and in-feed table, height adjustable sealing table and programmable sealing time.
