

Model 50 Pleat/Bunch Wrapping Machine

Features

- Product Feed Sensors
- Product direct to elevators
- Greater Stability for top heavy products
- Increased product flexibility
- Quick Changeover

Optional extras

- Autofeed unit
- Print Registration system
- Coder Unit
- Additional change parts available

Established as one of Cpack's traditional wrapping machines, the Model 50 is particularly suitable for soaps, adhesive tape, bearings, deodorant blocks, single biscuits, small cakes and pies.

Variable speed drive up to 100+ cycles per minute and "No product- No wrapper" are standard features on the machine and the comprehensive guarding combines safety and accessibility to the maximum effect. Can also be fitted with an external printing and labelling system as shown in picture above.
