## MODEL 70 BUNCH WRAPPING MACHINE

### Features

- Print registration unit
- Central lubrication system
- Stainless steel lower panels
- Choice of product trips and in-feeds
- Greater stability for top heavy products
- No rubbing of product base on infeed
- 45 products per minute packing speed
- New easy to clean guards
- Plastic in-feed belt
- Product carried direct to elevators
- Increased product flexibility

The **Model 70** is a large improvement over the previous generation of Bunch Wrappers, which provides customers with a smart bunch wrap that is sealed on the base. The **Model 70** is ideal for cakes, pies, cheeses and other round products.

Featuring a choice of product trips and in-feeds the **Model 70** can be tailored to the exact requirements your product needs. This machine has been improved minimizing product contact, giving a smoother transition throughout the machine. **This intelligent bunch wrapper comes complete with a print registration unit allowing you to print dates and other information on the packaging material of your items.**
