Cpack provide a wide range of shrink wrapping machines, specially designed to complement the whole range of our packaging systems. Our **Monoblock Shrink Wrapping Machine** comprises a flexible sleeve wrapper and linkedshrink tunnel on the same compact frame to ensure excellent product transfer and the smallest machine footprint.

Available in Automatic & Semi-Automatic versions to suit your production.

With efficiency at the core of its design, the SW range of Shrink Wrapping Machines utilize our new heat recycling system ensuring a smaller amount of heat is lost from the shrink tunnel to minimize the running cost of the system. In addition high performance insulation is fitted to the tunnel further reducing heat loss and manufacturing costs. Operating at speeds of up to 20 per minute with our hot blade sealing system for high speed operations.
