- Improved Seal Integrity
- Film Reel Holder
- Energy Efficient Fibre Insulation
- Optional Swing Arm Touchscreen Interface
- Patent Pending
- No Vacuum Pump Technology

Cpack Packaging is proud to present the **SP7 and SP7 Super Skin Packaging System**, the next-generation of our popular Skin Packaging series. With our 3D design system and utilising new technology, the new version of our popular SP3 machines has improved sealing, less operator involvement and reduced maintenance

The **SP7** Skin Packaging System is capable of wrapping several boards a minute, with an optional in-feed and out-feed table to streamline your production process. The sealing area is 765x511mm, but can be customised to clients requirements. New features of the **SP7** include automatic magnetic locks, a twin film reel holder, no vacuum pump, and improved seal integrity.
