CPack's **SS3000** Sandwich Sealing Machine is a one-stop solution for sealing sandwich wedges of all sizes into plastic trays. In recent years, triangular boxed sandwiches have become a staple of a day's lunch breaks and our sandwich sealing machine can help your packaging of these tasty meals by packaging up to 60 products per minute. The **SS3000** provides a perfect seal on every sandwich ready for display at the point of sale.

CPack have designed and improved the **SS3000** Sandwich Sealing Machine for new and existing clients with a new heated roller system, improving temperature control and efficiency, allowing roller changeovers to be performed by any trained operator and eliminating unnecessary downtime.

WORLD-LEADING PACKAGING MACHINERY DESIGNED & BUILT IN THE UK
