Cpack's latest developments in pleat and bunch wrapping technology have resulted in the **WRAP KING 4000**. Utilizing advanced computer control combined with servo technology, our machine provides unparalleled flexibility, adaptivity and performance. Ideal for wrapping pies, Puddings, cakes, cheeses and more at speeds of up to 70 products per minute.

Our **Wrapking 4000** is the only machine in the world of its kind, and is unique that National and International Patents to Protect the Machine. The first machine is now in production with a major food producer in the UK, and been a great success. With several addition machine orders in the pipeline.

Next-Generation Features

No cams, levers or mainshaft ensures minimal maintenance and cleaning. The inbuilt computer can be linked to the client's server for up-to-the-minute production details. All parts of the machine are visible without having to open guards, meaning obstructions can be quickly and safely identified.
