Revision: 09.12.2020 Print date: 09.12.20

# 1. Identification of the substance/mixture and of the company/undertaking

# 1.1. Product identifier

Whittle Waxes Preparation Cleaner

# 1.2. Relevant identified uses of the substance or mixture and uses advised against

## Use of the substance/preparation

Surface treatment of wood and other materials

# 1.3. Details of the supplier of the safety data sheet

## Manufacturer

Whittle Waxes, PO Box 455 Cooroy, QLD, 4563 Australia Telephone no. +1300 326 929, 1300 ECO WAX

E-mail address

## 1.4. Emergency telephone number

Germany: +49 (0) 30 30686700

# 2. Hazards identification

# 2.1. Classification of the substance or mixture

## Classification (Regulation (EC) No. 1272/2008)

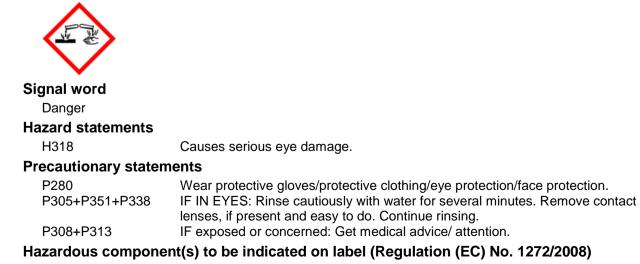

Classification (Regulation (EC) No. 1272/2008) Eye Dam. 1 H318 The product is classified and labelled in accordance with Regulation (EC) No 1272/2008 For explanation of abbreviations see section 16.

info@whittlewaxes.com.au

## 2.2. Label elements

# Labelling according to regulation (EC) No 1272/2008

## Hazard pictograms

#### Note

[3] Substance with occupational exposure limits

## 4. First aid measures

### 4.1. Description of first aid measures

#### **General information**

In all cases of doubt, or when symptoms persist, seek medical attention. If unconscious place in recovery position and seek medical advice. First aider: Pay attention to self-protection! Remove affected person from danger area, lay him down.

#### After inhalation

In case of accident by inhalation: remove casualty to fresh air and keep at rest. Keep warm, calm and covered up. In all cases of doubt, or when symptoms persist, seek medical attention.

#### After skin contact

Wash off immediately with soap and water. Do NOT use solvents or thinners. Consult a doctor if skin irritation persists.

#### After eye contact

Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. Take medical treatment.

### After ingestion

Do not induce vomiting. Take medical treatment.

# 4.2. Most important symptoms and effects, both acute and delayed

Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. High concentration of vapours may cause irritation to eyes and respiratory system and produce narcotic effects.

# 4.3. Indication of any immediate medical attention and special treatment needed

# Hints for the physician / treatment

Treat symptomatically.

# 5. Firefighting measures

# 5.1. Extinguishing media

# Suitable extinguishing media

Recommended: alcohol resistant foam, CO2, powders, water spray/mist

Version: 26 / GB

Replaces Version: 25 / GB

Revision: 09.12.2020 Print date: 09.12.20

## Non suitable extinguishing media

Do not use a solid water stream as it may scatter and spread fire.

## 5.2. Special hazards arising from the substance or mixture

Fire will produce dense black smoke. In a fire, hazardous decomposition products may be produced. Exposure to decomposition products may cause a health hazard. Vapours can form an explosive mixture with air.

## 5.3. Advice for firefighters

### Special protective equipment for fire-fighting

In case of combustion evolution of dangerous gases possible. Use self-contained breathing apparatus.

#### Other information

Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire with water. Standard procedure for chemical fires.

## 6. Accidental release measures

# 6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all ignition sources if safe to do so. Ensure adequate ventilation. Do not inhale vapours. Do not inhale gases. Do not inhale mist.

### 6.2. Environmental precautions

Do not allow to enter drains or waterways. Do not allow to enter soil, waterways or waste water canal. In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.

### 6.3. Methods and material for containment and cleaning up

Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth and place in container for disposal according to local regulations (see section 13). Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations. Do NOT use solvents or thinners. Send in suitable containers for recovery or disposal.

### 6.4. Reference to other sections

Refer to protective measures listed in Sections 7 and 8.

# 7. Handling and storage

## 7.1. Precautions for safe handling

### Advice on safe handling

Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. Keep container tightly closed and dry in a cool, well-ventilated place. Use only with adequate ventilation/personal protection. Ensure adequate ventilation. Provide for sufficient ventilation. This can be achieved by local exhaust or general exhaust air collection. Wear a suitable respirator if the ventilation is not sufficient to keep the solvent vapour concentration below the occupational limit values. Avoid contact with skin and eyes. Avoid inhalation of vapour and spray mist. Do no eat, drink or smoke when using this product. Use personal protective clothing. For personal protection see Section 8.

### Advice on protection against fire and explosion

Vapours can form an explosive mixture with air. Vapours are heavier than air and may spread along floors. In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. Take measures to prevent the build up of electrostatic charge. Wear shoes with conductive soles. No sparking tools should be used. Fight fire with normal

| Concentration                   | 2,74                                | mg/kg                |

## 8.2. Exposure controls

#### **Exposure controls**

Users are advised to consider national Occupational Exposure Limits or other equivalent values. Provide for sufficient ventilation. This can be achieved by local exhaust or general exhaust air collection. Wear a suitable respirator if the ventilation is not sufficient to keep the solvent vapour concentration below the occupational limit values.

### **Respiratory protection**

Avoid inhalation of vapour and spray mist. Use breathing apparatus if exposed to vapours/dust/aerosol. Recommended Filter type: Respiratory protection mask with combination filter A/P2

## Hand protection

#### Glove material

| Appropriate Material | butyl- | rubber |     |
|----------------------|--------|--------|-----|
| Material thickness   | >=     | 0,7    | mm  |
| Breakthrough time    | >=     | 30     | min |

This recommendation is valid only for the product named in this safety data sheet supplied by us, and only for the indicated intended use purposes.

For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

The instructions and information provided by the glove manufacturer on use, storage, maintenance and replacement must be followed.

The breakthrough time must be greater than the end use time of the product.

Version: 26 / GB

Replaces Version: 25 / GB

Revision: 09.12.2020 Print date: 09.12.20

Gloves should be replaced regularly and if there is any sign of damage to the glove material. The performance or effectiveness of the glove may be reduced by physical/ chemical damage and poor maintenance.

#### Eye protection

Wear eye glasses with side protection according to EN 166.

#### **Body protection**

Wear suitable protective clothing. Remove contaminated clothing and wash it before reuse. Wash hands before breaks and after work.

### 9. Physical and chemical properties

# 15. Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### VOC

VOC (EU)

% 95 g/l

### Other information

All components are contained in the TSCA inventory or exempted.

## 15.2. Chemical safety assessment

For this substance / mixture a chemical safety assessment was not carried out.

9,3

## **16. Other information**

### Hazard statements listed in Chapter 3

| H302 | Harmful if swallowed.                            |
|------|--|
| H312 | Harmful in contact with skin.                    |
| H315 | Causes skin irritation.                          |
| H317 | May cause an allergic skin reaction.             |
| H318 | Causes serious eye damage.                       |
| H319 | Causes serious eye irritation.                   |
| H332 | Harmful if inhaled.                              |
| H400 | Very toxic to aquatic life.                      |
| H411 | Toxic to aquatic life with long lasting effects. |

### **CLP** categories listed in Chapter 3

| Acute Tox. 4      | Acute toxicity, Category 4                                |
|-------------------|---|
| Aquatic Acute 1   | Hazardous to the aquatic environment, acute, Category 1   |
| Aquatic Chronic 2 | Hazardous to the aquatic environment, chronic, Category 2 |
| Eye Dam. 1        | Serious eye damage, Category 1                            |
| Eye Irrit. 2      | Eye irritation, Category 2                                |
| Skin Irrit. 2     | Skin irritation, Category 2                               |
| Skin Sens. 1      | Skin sensitization, Category 1                            |

### Abbreviations

ADR - Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road) RID - Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning theInternational Transport of Dangerous Goods by Rail) IMDG - International Maritime Code for Dangerous Goods IATA - International Air Transport Association IATA-DGR - Dangerous Goods Regulations by the "International Air Transport Association" (IATA) ICAO-TI - Technical Instructions by the "International Civil Aviation Organization" (ICAO) GHS - Globally Harmonized System of Classification and Labelling of Chemicals EINECS - European Inventory of Existing Commercial Chemical Substances CAS - Chemical Abstracts Service (division of the American Chemical Society) GefStoffV - Gefahrstoffverordnung (Ordinance on Hazardous Substances, Germany) LOAEL - Lowest Observed Adverse Effect Level LOEL - Lowest Observed Effect Level NOAEL - No Observed Adverse Effect Level NOEC - No Observed Effect Concentration NOEL - No Observed Effect Level
