The Safe n Simple Security Support Belt has many features to provide the all-important balance between comfort and support: Easy to put on, worn without restriction, simple to adjust, easy access, with a minimum of fuss. Modern developments in 2-way square stretch fabric technology allows the Security Support Belt to fulfill these requirements.

The Security Support Belt is available both with an adjustable pouch opening or without an opening for additional Hernia protection. Ostomy pouch wearers can wear either support belt option without having to worry about impeding their stoma function.

Follow the steps to order the belt that is right for you....

### TIPS FOR MEASURING:

1. Measure abdominal girth at the center point of the hernia or stoma. You can stand or lay flat.
2. Measure depth of your torso to determine if the 6"-16cm, 8"-20cm or 10-1/4"-26cm size will be the right fit for you. (Keep in mind that the hernia should be covered at least 75% by the belt.) For sizes XL and larger we recommend the 8" or 10.25" depths to keep the belt from rolling up in the back.
3. Determine if you need a right, left or both sides\* belt. (\*double stoma-special order only)
4. Determine the size, color and style you need from the charts - below and on other side (Sizing tip: If you measure within an inch to the largest measurement of each size then move up to the next size belt.)
