

Press release from Electrocompaniet, September 2019:

Introducing the ECI 80D.

This month, Electrocompaniet is launching a new integrated amplifier in its Classic Line series.

The ECI 80D is our brand-new, entry-level integrated amplifier. The new ECI 80D offers 2 x 80 Watts into 8 Ohms, using an in-house developed Class A/B Amplifier. We have equipped the ECI-80D with a built-in RIAA pre-amplifier for your LP player (MM cartridge support), 2-way Bluetooth HD for both streaming from your iOS, Android unit, Mac or PC, and also HD streaming to your High-end headphones. There is also 2 analogue singled ended inputs, 5 digital inputs (2 COAX, 3 Toslink), 2 headphones-out connections and of course the legendary Electrocompaniet sound and unique aesthetics.

As a result we can offer you an extremely substantial and dynamic integrated amplifier with an attractive form-factor, capable of controlling a wide range of speakers on the market.

The amplifier is carefully balanced between good bass extension and control, a detailed open midrange and a warm detailed top, as with all our quality products. All to ensure that the ECI 80D will reproduce your favorite music the way it was recorded.

Available from October 2019.

Electrocompaniet - Our 45 years of legendary Hi-Fi products from Norway gives us a unique perspective. Electrocompaniet was established in 1973, and we are the leading Norwegian manufacturer of high quality Hi-Fi equipment. Our products are loved by professionals, audiophiles, press and musicians alike, and once experienced, the sound of Electrocompaniet says it all. Our product range consists of CD-players, DACs, amplifiers and speakers available on both the High-End Classic line and Lifestyle EC Living line. Electrocompaniet products are made in Norway and sold by authorized distributors and dealers in more than 50 countries.
