# New features and services with the EC PLAY App update

*Tau, Norway, 21nd April 2021 – Electrocompaniet has updated its EC Play app to include multi language support and tablet landscape orientation support. The EC play is used to control their range of network audio streamers, speakers, and integrated amplifiers.*

With nearly 50 years of experience, Electrocompaniet has over the years created award-winning high-quality audio products, and it has always strived to ensure its customers enjoy listening to their music collections in a variety of different ways.

With the brand-new app EC play version 1.6, they've added support for German, Norwegian, Spanish, French, Dutch, Portuguese, Hungarian, Turkish, Russian, Vietnamese, and Simplified Chinese. More languages will be added soon. In addition, Landscape support for tablets on both iOS and Android-based is also supported. The app update is also in preparation for several noteworthy updates in the near future, as well as some general bug fixes.

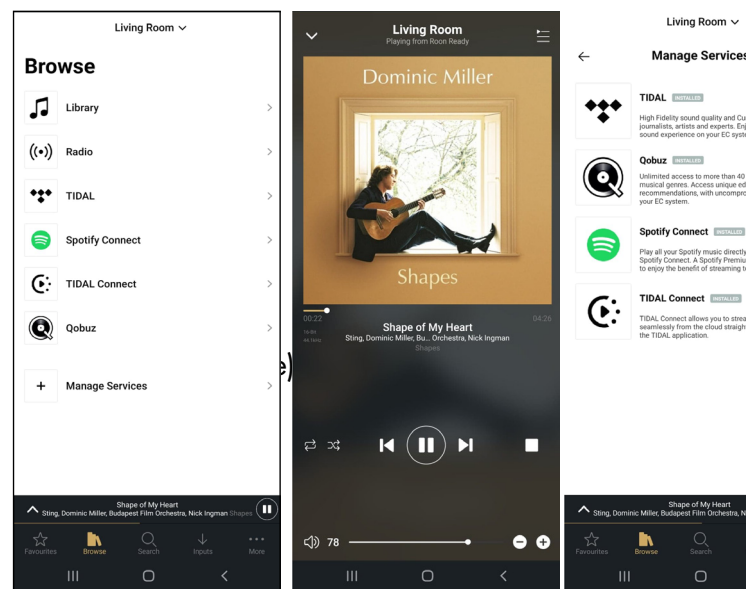

The update will be available free of charge for both iOS® and Android® based phones and tablets over the coming days. The app supports the following products:

## Current products

- Tana SL2 Speaker and streamer (EC Living Line)
- ECI 6 DX MKII Integrated Amplifier, DAC and streamer (Classic Line)
- ECM 1 MKII Network Streamer (Classic Line)

## Legacy products

- Tana SL1 Steamer and speaker (EC Living Line)
- Rena SA1 Network Steamer, DAC and Amplifier
- Rena S1 Network Steamer and DAC (EC Living Line)
- ECM 1 Network Streamer (Classic line)
- ECI 6 DX Integrated Amplifier, DAC and streamer (Classic line).

*"The EC Play app is our own, in-house developed app designed to control our range of streamers, integrated amplifiers and wireless speakers based on the critically acclaimed EC Software Engine streaming platform", says Lasse Danielsen, Sales & Marketing Director at Electrocompaniet.*

*"We constantly get feedback form our client s all over the world, and multi-language has been a much requested feature we are now able to deliver."*
