NewAir I.B.® Nano

On-Demand Inflatable Protection and Void Fill System

Ship From Anywhere at Anytime
NewAir I.B.® Nano

The NewAir I.B.® Nano is a compact inflator designed for businesses that benefit from the choice of Bubble Wrap® I.B. on-demand cushioning and on-demand air pillow solutions Fill-Air Extreme® and Fill-Air Extreme® AirWrap. It’s designed at a space-saving size and price point that fits most budgets.

ON-DEMAND INFLATABLE PROTECTION AND VOID FILL SYSTEM

Inflatable product protection, available when and where it’s needed at the push of a button, is helping businesses move away from pre-inflated packaging materials as well as foam packing peanuts. By combining void fill and damage reduction within the same easy-to-use system, NewAir I.B.® Nano saves businesses space, time, and money.

EASY TO USE

NewAir I.B.® Nano is similar to household appliances in its simplicity of use and electrical requirements. An intuitive touch panel provides start and stop buttons, along with other operational settings. The device plugs into regular outlets, and once turned on is ready to use with a single touch. No training is needed to set up and run the NewAir I.B.® Nano inflator.

SPACE SAVER

The system is lightweight and portable. Weighing just 25 pounds, it can fit on most tabletop surfaces and be moved when and where it’s needed. The system inflates flat rolls of film that require much less storage space than pre-inflated packaging material or foam peanuts.

SUSTAINABLE AND REUSABLE

With Sealed Air’s long lasting, superior cushioning protection, products are secure throughout the entire shipping cycle, reducing damage and needless re-shipping of replacement orders. Enhanced inflation and air retention allows for less material usage and reusability.

By deflating after use, the material can be disposed of flat. No longer do your customers have to deal with bulky materials that end up in the landfill.
