MITER-PRO SERIES

TENRYU'S ultimate woodworking blade for miter saws and radial arm saws

TENRYU responds to customer demand! We now have a line of blades specially designed for high performance and heavy duty applications on miter saws, slide-miter saws and radial arm saws. These are our "Cadillac/Mercedes" grade miter saw blades.

TENRYU'S proven, super-true, laser-cut, hand tensioned steel plate with new and improved, patented, resin bonded expansion slots ensures smooth, accurate and quiet cuts.

Specially designed, top-quality, micrograin carbide tips, honed to a precision edge with 6 diamond wheels cut clean and easy.

Zero degree hook angle prevents lifting of workpiece but does not make your saw overwork. The result is a safe, clean and smooth cut.

EACH BLADE FEATURES:

- Fully-hardened, expertly-tensioned tool steel bodies for true and accurate cuts.
 - High-grade, fine grain carbide tips for long life.
 - Super-fine grit honing of carbide edge for clean, smooth cuts.
 - Additional resin bond-filled expansion slots for even quieter cutting.
