Honeybee Farms

Bee Propolis

Nature's Powerful Probiotic

POWERFUL ANTIOXIDANT
STRENGTHENS IMMUNE SYSTEM
FIGHTS BACTERIA, VIRUSES & FUNGI
COMBATS ARTHRITIS, RHEUMATISM & HYPERTENSION
RICH IN PHYTOCHEMICALS

Produced in:

Silang,, Cavite, Philippines

NATURE'S MOST POWERFUL PROBIOTIC

Ilog Maria Bee Propolis

Propolis is nature's most powerful Pro-Biotic.

Our European honeybees collect propolis the flowering buds and the bark of trees in clean & cool highlands of Silang, the largest town in the Cavite uplands. They masticate and “condition” this propolis to make it softer and varnish their entire beehives and honeycombs with it. When this is done, they deposit it in special “propolis traps” in our beehives.

Propolis forms trees' immune systems. Propolis fights bacteria, fungi & viruses that attack trees. Our bees and use this bee propolis to varnish the insides of their entire beehives; including the insides of all the cells in their honeycombs to sanitize all that propolis touches.

Each time an attacker, stung to death inside the beehive, is too heavy to be pulled out; our bees embalm it with their propolis. This bee propolis-embalmed moth, mouse or lizard is preserved by the bee propolis and is perfectly mummified without putrefaction or decay. This is perfect proof of the potency of propolis. In fact, Lenin's corpse is also embalmed in propolis and is perfectly preserved in a glass coffin for all to see.

Bee Propolis is packed with phytochemicals and anti-oxidants which combat the ill effects of exposure to all kinds of pollution, carcinogenic substances, carcinogenic conditions and eating processed or preserved foods.

After almost thirty years, we have found the perfect solvent for absorbing all the beneficial contents of bee propolis. Coconut brandy has its own monolaurins that strengthen your immune system. My childhood friend Philip Eleazar, runs two huge coconut plantations in Cotabato, Mindanao. His plantations have never seen fertilizers and any chemicals. He produces Don Felipe organic coconut brandy from fermented

coconut sap.

We collect bee propolis and macerate it in **Don Felipe organic coconut brandy** in our cellars for about a year. After waiting so long in the cellar, it becomes ***Ilog Maria*** Bee Propolis. ***Ilog Maria*** Propolis is the living essence of bee propolis.

We can then carefully decant ***Ilog Maria*** Bee Propolis in its fully concentrated form. It is ready for bottling & use. After more than three decades, we have found that this is the most effective way that our body can absorb all the beneficial ingredients of bee propolis.

Ilog Maria Bee Propolis

Therapeutic Indications of ***Ilog Maria*** Bee Propolis

Ilog Maria Bee Propolis has been found effective in the treatment of: high fever, arteriosclerosis, angina, pharyngitis, laryngitis, sinusitis, rhinitis, hay fever, bronchitis, asthma, tuberculosis, halitosis, gingivitis, gastrointestinal ulcers, eczema, multiple sclerosis, infections of the kidneys, bladder or urinary tract, varicose ulcers, muscular dystrophy, Parkinson's disease, cerebrovascular deficiencies, thyroid ailments, rheumatism, sore eyes, blocked sinuses, bruises and burns, colds, coughs and flu, acne, arthritis, hypertension, coronary heart disease, women's disorders, cancer control, irradiation disease, herpes and allergies.

Powerful Anti-Oxidant

Ilog Maria Bee Propolis is a powerful anti-oxidant which combats the oxidizing effects of : exposure to all kinds of pollution, eating processed foods, preserved foods and ingestion or contact with other carcinogenic or oxidizing agents.

Ilog Maria Bee Propolis boosts your immune system.

Ilog Maria Bee Propolis contains:

- 50% Resins and Balms
- 30% Beeswax
- 10% Volatile and Essential Oils
- 5% Bee Pollen
- 5% Various Organic and Mineral Matter

Organic Acids: Benzoic Acid, Gallic Acid

Phenol Acids: Caffeic Acids, Chromic Acid, Ferulic Acid, Coumaric Acid

Aromatic Aldehydes: Vanillin, Isovanillin

Coumarines: Esculetin, Scopoletin

Flavonoids:

Flavones: Acacetin, Chrysin, Pectolinarigenin, Pinocebrin, Teptochrysin

Flavonols: Galaga, Izalpinine, Kaemferol, Guercetin, Rhamnocitrin

Flavonones: Pinostribine, Sakuratenin

Flavonols: Pinobanksine

Note: Flavonoids have a direct action on blood capillaries, potentialization of ascorbic acid activity and decrease in inflammation.

Minerals:

- Aluminum
- Barium
- Boron
- Calcium
- Chromium
- Cobalt
- Copper
- Manganese
- Molybdenum
- Nickel
- Pewter
- Selenium
- Silicon
- Silver
- Strontium
- Titanium
- Vanadium
- Zinc
- Iron

Vitamins:

- Provitamin A
- B1
- B2
- B3
- Vitamin C
- Vitamin E
- PP – Nicotinamide

Other Constituents:

- Xanthreol
- Pterstilbene
- Lactones
- Polysaccharides
- Amino Acids
- O- and M- Coumaric Acid
- Gentsic Acid
- Hydrocafferie Acid
- Salicylic Acid

Note: Coumaric Acid is a powerful phytochemical that acts as a cancer preventive.

Natural Probiotic Action

Ilog Maria Bee Propolis is the only natural and organic probiotic. It is the safest, non-toxic substitute for synthetic antibiotics, especially for those already allergic to penicillin and its derivatives. Bee Propolis is nature's remedy for diseases caused by bacteria, viruses or fungi that have become resistant to man-made antibiotics.

Strengthens Immune System

Our immune systems are under constant attack by air pollution and water pollution. To make matters worse, our immune systems are weakened and taxed by the trace chemicals and minute poisons in the food we eat. Over processed and preserved foods are also one of the main culprits.

We get sick when our battered immune systems cannot perform their primordial function of protecting our bodies from infections. So, we resort to chemical medicines, treating the symptoms but not the causes. This practice of consumption of medicines further weakens our immune systems and is a leading cause of death in America.

Ilog Maria Bee Propolis is the only substance in nature that enhances and strengthens your immune system; it is a "Probiotic". "Probiotic" because it raises the body's natural resistance to disease by internally stimulating our own immune system. Propolis strengthens the thymus gland to increase your life energy.

Dosage for Internal Use

For Strengthening Immune System

Adults: Take 1 ml or 25 drops of *Ilog Maria* Bee Propolis in honey, juice, milk or water on an empty stomach – before breakfast.

Children above 1 year old: Take 1ml or 25 drops of *Ilog Maria* Bee Propolis in honey, juice, milk or water on an empty stomach – before breakfast.

Children below 1 year old: Take ¼ to ½ ml or 6 to 12 drops of *Ilog Maria* Bee Propolis in honey, juice, milk or water on an empty stomach – before breakfast. It will be prudent to start with a low dose; increase as the baby's body becomes accustomed to *Ilog Maria* Bee Propolis.

For Fighting Infection

The best time to use *Ilog Maria* Bee Propolis is when the first signs of infection are felt or seen: teary eyes, runny nose, chills, slight fever, weariness or lethargy. The best strategy is to bombard the infection with successive doses until the agents of infection are excreted.

Take the above dosages **every hour** until the symptoms abate. You will be surprised at how fast this happens.

Dosage for External Use

Ilog Maria Bee Propolis can also be used externally for: ulcerated or infected wounds, fungal infections, as first aid for burns. And all cases where it has a chance to penetrate. *Ilog Maria* Propolis Ointment stays longer on your skin and is most effective when you want propolis to soak into your skin.

Storage

In long term storage, you will notice a precipitate forming at the bottom of the bottle. These are some of the waxes and resins that have “gone out of solution”. Strain through a coffee filter if these make you uncomfortable; and use.

Propolis was used in the ancient “Book of the Dead” in Egypt as an essential ingredient in mummification. Propolis was used by the master luthiers of Cremona, Italy: Antonio Stradivari and Pietro Giovanni Guarneri, who made the legendary Stradivarius and Guarnerius violins which survive to the day, about 400 years later.

Propolis is a natural preservative which we use on almost all our products. It does not spoil.

Joel and Violaine Magsaysay
