

# L2E

## GPR System Upgrade

Upgrade your Level 2 Collision System to KECO's L2E Tool set. The L2E is the most comprehensive glue pull repair system available to body shop technicians. The L2E includes new tools, features, and enhancements developed by listening to technicians and shop owners to create the most efficient GPR system available.

**The fast repair method got even faster.**

### Efficient Metal Flow

Extended height legs & modular knockdowns work together to create a more efficient double action metal flow

Double action from the Recon-Robo attacks both sides of the panel simultaneously to make short work of fender & edge damage

Multiple 25mm straight centipedes work together with 300mm TabTrax to correct rockers and posts

Multiple curved 25mm Centipedes & Curved TabTrax work together to repair quarter/fender damage

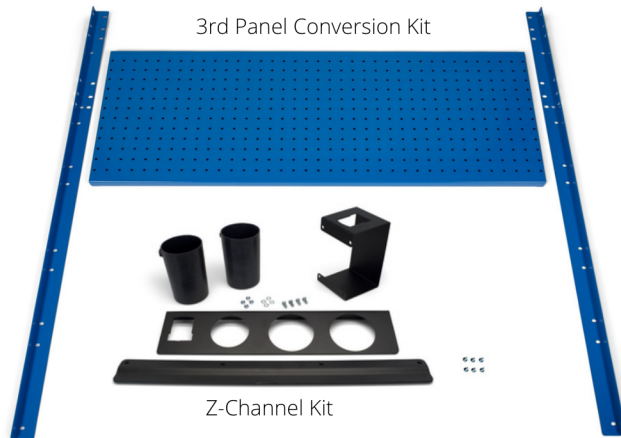

16-piece intermediate Crease Tabs fill a gap in the repair continuum as Dead Center tabs employed too soon in a repair can create distortion rather than efficient metal flow

### Storage & Organization

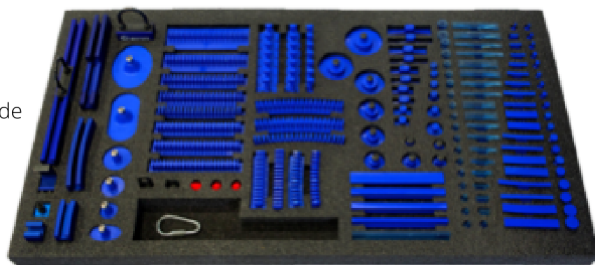

TabPrints organizer, along with the Z-Channel platform store glue gun, heat gun, thermometer, and glue to keep tools and tabs clean and organized in any shop

**\$1,999 USD**

SKU: 410-8418-L2E-UG

TabPrints Organizer Fully Loaded w/ Upgrade Tabs & Adapters

### Flat Finish Capability

The KECO L2E GPR System provides you with the tools required to achieve success throughout the entire repair continuum with speed

**Other Side for More Details >>>**

+ Works on Steel  
& ALUMINUM
