

# TECHNICIAN COMPANION GPR Collision System

The Technician Companion Kit is intended to cover a smaller percentage of collision shop repairs to work in unison with L2E Collision System. This allows technicians to work from the central L2E for larger tools and address a smaller percentage of damage with the satellite Technician Companion System. This is one more innovation from KECO based on job mapping and learnings from hundreds of in-shop training sessions where we have had the opportunity to see GPR repairs evolve first-hand.

## Partial Capability

The Technician Companion Kit allows technicians to approach damage throughout the repair continuum with confidence.

## Companion Toolset

The Technician Companion Kit allows technicians to work off of the L2E Shop System. This cart provides you with frequently used tools when repairing, giving multiple technicians the ability to utilize the L2E at once

## Partial Capability

The K-Bar and Slide Hammer are great tools to reduce large damage with the Centipedes and SuperTabs. The Robo Mini Lifter allows small damage correction with a limited selection of crease and finish tabs

## Tab Selection

Includes a limited selection of Centipedes and SuperTabs for large damage as well as a common selection of smaller Crease and Dead Center tabs for detail corrections

## Storage & Organization

KECOs GPR Cart, TabPrints organizer, along with the Z-Channel platform store glue gun, heat gun, thermometer, and glue to **keep tools and tabs clean and organized** in any shop

**\$2,599 USD (Shop System)**

**\$2,199 USD (Portable Kit)**
