

SDX.

Daily Care Instructions:

- Brush your hair gently with a natural boar bristle brush, in the same direction as the extensions were installed. Be sure not to brush the extensions in any manner other than how your hair grows naturally from your scalp.
- While sleeping, wear a low, loose braid directly down the center of your back keeping the tabs from being over directed during the night.
- Do not use excessive heat while styling your hair, 350 degrees with our LIVED IN collection and 200 degrees for our WEEKENDER collection. Please always remember to use a heat-protecting styling product on wet hair while blow drying and on dry hair before ironing. Avoid sulfates and keratins in all product usage.
- While exercising or swimming, bind the hair in a low ponytail, braid the remaining hair and bind the ends to keep the hair together during rigorous activities.
- Shampoo your hair regularly using sulfate and keratin free cleaners to avoid excessive oiliness
- Avoid conditioners, oils, or slippery-like products coming in direct contact with the tape-in hair extensions tab.
- Do not wear your tape-in hair extensions in high ponytails, top knots, or in any manner that would cause the tape-in hair extension tab to be pulled away from how it was installed.
- Check your tape-in hair extensions regularly to ensure proper care and maintenance. If you notice slipping or discomfort, contact a salon professional for guidance.
