ASSEMBLY INSTRUCTIONS (<https://www.youtube.com/watch?v=2xgCAg5-Iqg>)

Item Name/Description : 45 Qt Wooden Cooler W/Plastic Liner
Holds up to 45 cans plus ice

Item No:911364

UPC Code: 6-81129 -11364-4

Item No:909716

UPC Code: 6-81129 -09716-6

Item No:909718

UPC Code: 6-81129 -09718-0

Item No:909720

UPC Code: 6-81129 -09720-3

Item No:909721

UPC Code: 6-81129 -09721-0

WARNING

1. This cooler is NOT a toy !
2. Adult assembly required!
3. Please keep all packaging materials from your child as they are potentially dangerous to your child!
4. Please keep child away while assembling as packaging or unassembled parts may be a choking hazard or cause injury!
5. This cooler is NOT a seat !
6. Avoid children climbing on, playing in or hiding in cooler!
7. POWER TOOLS ARE NOT NECESSARY TO ASSEMBLE THIS PRODUCT AND ARE DISCOURAGED, WOOD DAMAGE COULD OCCUR

ASSEMBLY INSTRUCTIONS

Decor Will Vary Depending On Purchase

• Parts List

A: Cooler Body With Decor --1PC	B:Legs--4PCS B1+B2	C:Small Star--3PCS	D:Cast Iron Handle-3PCS
			
E: Bottle opener--1PC	F:metal stablizer--4PCS	G: Large Screw--26PCS	
			
		H: Medium Screw-12PCS	I: Short Screw-24PCS
			

Step 1:Place the cooler body on the side or upside down. Secure the four legs (B) to the cooler body (A) using the large screws (G--24PCS).

Attention:Each leg assembly needs Large screws(G--6PCS)

Step 2: Securely fasten the metal stabilizers (F) to the inside of each leg using short screws (I--5PCS) on the holes into legs. Use medium screw (H --1PC) to secure bracket UP into base of cooler on front 2 legs, short screw (I) should be used to secure bracket to cooler body on rear legs. Do not use long or medium screws into side legs

Step 3: With two people, stand the cooler in an upright position.

Step 4: Attach the decorative pieces (C) to the top or front of the cooler body. Carefully attach one handle (D) to each side of the cooler body using medium screws (H--4PCS). Carefully secure one handle (D) to the lid of the cooler body using medium screws (H--2PCS) in the rear handle holes, and short screws (I--2PCS) in the front holes -

be careful NOT to push screws through bottom of lid. Attach the bottle opener (E) to the front of the cooler body using large screws (G--2PCS).

Note: Attach handle with 4 screws (H--2PCS & I--2PCS), Be careful to position handle so screws enter insulation and are not exposed beneath the lid.

Step 5: Before using the cooler, please secure the drain to the bottom hole of the cooler body. Please note: the 2 washers on the drain should be put on in the following manner -- one is above the drain on the bottom hole, and the other is below the drain. Finally insert and attach the drain to the cooler. Remember to tighten the drain valve on the underside of the cooler body to prevent leaking. Please note, at times, condensation may occur on the bottom of the cooler.

To Care for the Cooler:

- Leaving the cooler in prolonged sunlight or rain will weather the wood.
- Reseal the wood surface every six months or as needed.
- Please use water or mild detergent and soft cloth to clean the inner compartment.
- Do not scratch or scour
- It is recommended to store your cooler box in a dry place.
- The cooler may be prone to tipping over during high winds. Please take necessary precautions to prevent tipping.

Our wooden coolers with either galvanized steel or plastic polyurethane lining can be cleaned using a solution of mild soap and warm water. Be sure to rinse with hot soapy water and drain completely. If there is a tough stain, use baking soda and water to remove. Remove odors with a diluted solution of chlorine bleach and water. If an odor persists, wipe interior with a cloth saturated with vanilla extract, then leave the cloth in the cooler overnight. We know it sounds far-fetched, but it really does work. Always air dry with the lid open before storing. During long periods of non-use, store furniture in covered and dry place. For the least maintenance, use under covered area.

Dear friends – Thank you for purchasing one of our most popular coolers.

Any product used outdoors will require care and maintenance, our wooden cooler is no different. Natural weathering and cracking will occur as the wood expands and contracts while exposed to the natural elements. DDI does not warranty the finish of the wood due to weathering or other natural elements that could affect the wood. These factors do not constitute a reason to reject the product, it only improves the character and does not affect the structural integrity of the product. We recommend the use of outdoor paint or stain for our patio wood furniture to help protect against the elements and prolong the life of the product. Periodic cleansing and recoating may be necessary. When properly maintained, you will love the way the cooler weathers AND provides enjoyment for many seasons.

The interior of the cooler should be maintained as well – after use, completely drain, dry and clean the inside with a soft, damp cloth and MILD, non-abrasive cleanser and “prop” the lid open to allow air to circulate. The drain cap works GREAT for this- remove drain cap from drain, place it between the lid and cooler body so the lid does NOT close completely. The interior of the cooler will be susceptible to rust or staining if not properly maintained. DDI will not warranty the cooler against rust if not properly maintained. A cloth with vanilla extract left inside keeps the interior smelling great.

Any claims made about the finish of the wood will be subject to DDI’s discretion. All products are subject to slight variations in color, shape or size due to manufacturing process and the nature of wood products. DDI, Inc. cannot be held responsible or liable for any inconvenience, damage, loss or injury due to possession, use or misuse of our products. Customers are solely responsible for ensuring the safety of any person or persons utilizing the furniture regardless of age while using, storing, holding, or owning our products.

To maximize ice retention, prechill your cooler before filling completely with high-quality ice and chilled beverages and product. A warm cooler, excess air space and warm beverages may result in rapid ice melt.
