

100% Locally Owned and Operated

FUSE DILUTION ON DEMAND

The **FUSE Dilution on Demand** is a trigger system incorporating a dispenser unit which utilises small cartridges of concentrated products, and dilutes it within the durable sprayer head itself, eliminating safety issues and the inconvenience of mixing and storage. The user simply fills one of the bottles with tap water and locks in a hygiene product cartridge as needed.

WASTE REDUCTION

Although this trigger bottle system is intended to provide efficiency and safety of your facility, it was designed for sustainability as well, which means you can be sure that you are taking a very significant step toward plastic waste reduction.

0.1% daily bleach concentrate

High-strength bleach suitable for domestic and commercial applications. Effective as a cleaner and also as a powerful chlorine sanitiser. Effective against a wide range of bacteria, fungi and algae.

- Meets MOE Guidelines for ECE Centres
- Used to sanitise general surfaces
- Also available in 0.5% daily bleach concentrate
- One cartridge saves over **20** bottles from landfill
- Makes 9.6L of useable product

Features and Benefits

Ease of Use

Fill the water bottle with water, clip in the concentrate and use.

A dilution tip ensures that the correct mix of water and concentrate is applied.

Health and Safety

Avoids mixing of chemicals and minimises chemical spills.

Ergonomically designed trigger sprayer that covers comfortably to your fingers to reduce hand fatigue.

No overuse of concentrate due to the accurate dilution system.

Sustainability

Removing unnecessary plastic from landfill.

The trigger spray is rated at over 100,000 sprays and lasts much longer than single-use sprays.

Concentrated formula enables diversion of up to 20 plastic bottles of concentrate.

Empty cartridges can be returned to Cleanlink, who will send back to the supplier for recycling.
