

OVEN BLAST & GRILL CLEANER

Biodegradable Oven Cleaner

Description:

Use Oven Blast as directed and your toughest cleaning tasks will be completed with ease. Oven Blast removes baked on residues from combi ovens, standard ovens, grills, hoods, and fryers, plus will do many other jobs that require a super heavy duty cleaner. Oven Blast is safe to use on mild steel, stainless steel, vitreous enamel, iron, nickel, chrome, and glass without the risk of chemical attack.

Oven Blast works by effortlessly locking onto rust, dirt, and grime when a surface is heated, then pulls off all loosened soil with the rinse water. Oven Blast contains over 47g/L potassium hydroxide, wetting and emulsifying agents and sequestrants. It has a clear brown appearance and a density of at least 1.105kg/L.

Directions for use:

CAUTION: Contains over 47g/L potassium hydroxide: wear gloves, eye protection, and protective clothing where there is a risk of skin contact.

Combi ovens: spray onto warm oven surfaces, turn on cleaning cycle.

Other ovens are best cleaned by preheating the surface to about 95°C for quickest results. Spray or pour OVEN BLAST onto the preheated surface. Allow one or two minutes to work, then scrape off residue with a spatula. Rinse with water or dilute vinegar after scraping. Repeat if necessary.

Test before use on brass, tin, copper, galvanised and painted surfaces - painted surfaces are best tested at a 10% dilution. Do NOT use on aluminium surfaces.

Safety Information:

- If poisoning occurs contact a doctor or Poisons Information Centre. Phone New Zealand 0800 764 766.
- If aspirated into the lungs, remove from exposure.
- If swallowed, do NOT induce vomiting, give water to drink and seek medical attention.
- If in eyes, hold eyes open, and flood for at least 15 minutes and see a doctor.
- If skin or hair contact occurs, remove contaminated clothing and wash skin thoroughly with water. First aid information

24 Hour toll free emergency phone no: 0800 243 622

Features:

- Biodegradable
- Removes baked on residues
- Contains >47g/L Potassium Hydroxide
- Contains Emulsifying Agents & Sequestrants
- Clear brown appearance

Areas of use:

- Combi ovens
- Standard Ovens
- Grills
- Hoods
- Fryers
