Please note that wood has characteristics which are outside the control of the manufacturer. Wood is a natural material and reacts to environmental conditions including temperature and humidity. Wood can shrink and swell in response to the surrounding environment in which they are located. In order to insure stability of the wood, it is important that the shuffleboard be maintained in an environment with steady humidity between 35% - 55%. Natural variations of color and grain patterns are not considered a manufacturing defect.

- Lifetime warranty for the polymer on the playing surface.
