

TECHNICAL DATA SHEET METAL CLEANER/DEGREASER

PRODUCT DESCRIPTION: SCULPT NOUVEAU'S METAL CLEANER and DEGREASER has been specially developed for rapid and complete removal of dirt, oil and grease from most metal surfaces in preparation for applying finishes. METAL CLEANER and DEGREASER is a ready-to-use, powerful formula developed to remove oxidation quickly and efficiently without leaving any residue or buildup that would prevent any adhesion of the paint or finish. METAL CLEANER and DEGREASER has built-in corrosion inhibitors that protect the metal surfaces while cleaning. METAL CLEANER and DEGREASER is NOT a polish and will easily remove or damage the finish on polished and plated surfaces. DO NOT USE on and avoid contact with Formica, marble, special colored grout, woods, fabrics and porous surfaces. Always test on an inconspicuous area before using. SPECIAL NOTE: OXIDATION STARTS FAST, SO WORK QUICKLY.

DIRECTIONS FOR USE: **DIRECTIONS:** Always wear goggles or face shield and rubber gloves when handling product. **SHAKE WELL BEFORE USING.**
For use on Bronze, Brass, Copper or Aluminum: 1) Apply with a brush, sponge or rag full strength onto the surface to be cleaned. 2) let solution soak for about 5 minutes or until the grease or scale dissolves. (Avoid prolonged contact time as this can damage the surface) 3) Rub the metal surface with a red or green Scotch-Brite pad to help the cleaning process. 4) Rinse the surface with water and dry thoroughly with a clean cloth.
For use on Iron or Steel: Same directions as above. Make sure to dry the surface quickly or rust will form.

If using as an immersion: Immersion time is approximately 5-10 minutes in warm water 120°F - 160°F. Tank should be mild steel, stainless steel or plastic. As the Metal Cleaner/Degreaser absorbs oils from parts, its cleaning efficiency will gradually diminish. Fresh cleaner should be added to keep the bath up to strength.

TECHNICAL DATA

PHYSICAL STATE:	Liquid	BOILING POINT:	> 100°C (> 212°F)
COVERAGE:	200 sq. ft. per gallon	SOLUBILITY IN WATER:	Complete
V.O.C.	Not applicable	Ph:	14.0
INHIBITORS:	Natural rust	INCOMPATIBLE SUBSTANCES:	Water-reactive substances, strong acids, oxidizers, halogens, flammable liquids

PACKAGING

8 oz 32 oz 1 Gallon 5 Gallon
