

Greetings QR athlete,

Thank you for purchasing a QBox. The smooth outer surface and shape of the box actually makes your PRsix more aero. We decided not to paint the interior to save weight for your benefit (besides you're not storing fine china here). We strive to produce products that make biking easier for you so you can focus on achieving your PR.

Happy Training and Racing!

Please visit our website
www.quintanarootri.com/q-box
for installation instructions.

Warning: Do NOT install mounting screws into frame without plastic slider in place. Installation of the mounting screws without the plastic slider in place may lead to an event where your Qbox may detach from your frame. Please install the provided plastic plugs into the mounting screw holes when the plastic slider is not present.
