- 1. Start by cutting out a strip of paper that is approximately 3/4-inch wide and 4 inches long.
- 2. Wrap the paper around the base of the intended finger, and then mark where the paper overlaps. The length of the paper you measured in millimeters is the circumference of your finger.
 - 3. After finding this measurement, use our conversion chart to find the corresponding ring size.

D-inside diameter C-inside circumference

D = 21.7 mmC = 68.17 mm
