

DRAIN & FRUIT FLY KILLER

Kills Drain Flies, Fruit Flies, Sewer Flies & Moth Flies

Pour in Drains To Kill at the Source

Deodorizes & Refreshes Stinky Drains. Kills Odor Causing Bacteria.

Maggie's Farm Drain & Fruit Fly Killer kills fly eggs, larvae and adults, and kills odor-causing bacteria to refresh stinky drains. Made with natural plant oils and other listed common ingredients, it's safe for you and your family when used as directed. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

DIRECTIONS FOR USE

Always read label directions and precautions prior to use.

Drain Treatments: Kills the eggs and larvae of drain flies, fruit flies, sewer flies and moth flies. Also helps repel adult flies from laying eggs in drains.

For frequently used drains: Apply around the edges to allow the thickened formula to coat the sides of the drain. Apply 1 to 2 oz per drain. For garbage disposals apply 2 oz. For best results, do not use drain for at least one hour after treatment, or ideally allow to sit overnight. Reapply as necessary.

For infrequently used drains: To help prevent flies and odors from coming up from the sewer system, first pour 1 to 2 quarts of water in the drain then apply 1 to 2 oz of the Drain & Fruit Fly Killer. To help keep the trap from drying out, apply 1-2 oz of vegetable oil or mineral oil to the drain. Do not flush with water after application of product and oil. If drain gets used, reapply the treatment.

Spray Treatments: Put a standard sprayer top on the bottle or transfer to a spray bottle. Spray areas that attract flies such as trash bins and kennel areas. Do not spray on pets directly.

PRECAUTIONS:

- We recommend good safety practices when using any insecticide such as avoiding contact with eyes and skin. Gloves and eye protection are recommended. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If any irritation persists, or if more than an incidental amount is swallowed, seek medical attention and have this label with you.

- Plant oil scents can be objectionable to some people. To get rid of the scent, run water down the drain until the scent dissipates. Clean up sprayed surfaces with water and dish soap.

Active Ingredients:

| | |
|----------------------------------|---------------|
| Sodium lauryl sulfate | 1.00% |
| Lemongrass oil | 0.38% |
| Thyme oil | 0.26% |

CAUTION

NET WT: 32 FL OZ

- Plant oils can damage some plastics. Application to very thin plastic and clear plastic is not recommended without test treating first.
- Do not apply to direct food contact surfaces. If product contacts food surfaces, wipe up with a damp cloth to remove.
- Staining is not anticipated on typical hard surface treatment areas. However, we recommend wiping up any product that gets on decorative surfaces.
- Keep out of lakes, streams and ponds.

Storage & Disposal: Store in original container in a cool, dry area away from heat and open flame. When container is empty, place in trash or recycle if available.
