

LURE & KILL JAPANESE BEETLE CONCENTRATE

Turns any Bucket into a Japanese Beetle Trap

Great Value • Makes 16 Traps!

Plant Oil Attractants.

Maggie's Farm Lure & Kill Japanese Beetle Concentrate contains the specific components of plant oils that are shown through research to be highly attractive to Japanese beetles. These plant oils are combined with a common surfactant that breaks the surface tension of the water and coats their wings, causing the beetles to drown in the water. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

DIRECTIONS FOR USE

Always read label directions and precautions prior to use.

Trap Preparation: Use a clean, 1-2 gallon bucket and fill about half full with tap water. Add 2 fl oz of Maggie's Farm Lure & Kill Concentrate and stir briefly to mix.

Trap Placement: The general recommendation is to place traps around the edges of the property to be protected. Ideally, place traps at least 30 ft from your garden or flowering plants. Non-flowering trees and shrubs are not attractive to Japanese beetles. Placing them downwind from the garden based on typical wind patterns is preferred. Depending upon the size of the property, multiple traps can be used and should be placed at least 30 feet apart. Try different trap locations to maximize effectiveness.

Trap Checking & Replenishment: When the surface of the water gets significantly covered with dead beetles, scoop them out and dispose of them. We do not recommend feeding the dead beetles to poultry. Replenish trap water and attractant after heavy rains or every one to two weeks as needed.

Helpful Tips: We do not recommend treating plants with Maggie's Farm 3-in-1 Garden Spray when adult Japanese beetles are active in the area, as the plant oils can be attractive to them. Instead, treat plants with Maggie's Farm Beetle & Boxelder Bug Killer or Maggie's Farm Vegetable Garden Insect & Disease Control, following label directions.

PRECAUTIONS:

- We recommend good safety practices when using any insecticide such as avoiding contact with eyes and skin. Gloves and eye protection are recommended. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If any irritation persists, or if more than an incidental amount is swallowed, seek medical attention and have this label with you.

Active Ingredients:

Sodium lauryl sulfate	2.00%
Clove oil	1.05%
2-Phenylethyl propionate	0.45%
Geraniol	0.45%
Inert Ingredients:*	96.05%
Total	100.00%
*Water	*When used as directed

KEEP OUT OF REACH OF CHILDREN

CAUTION

NET CONTENTS: 32 FL OZ

- Plant oils may cosmetically damage some plastics. Application in very thin plastic, clear plastic or decorative containers is not recommended without test treating first.
- Keep out of lakes, streams and ponds.

Storage & Disposal: Store in original container in a cool, dry area away from heat and open flame. When container is empty, place in trash or recycle if available.
