Maggie's Farm Bed Bug & Flea Killer kills bugs fast. In lab tests, bed bugs and fleas were dead less than one minute after being sprayed with Maggie's Farm Bed Bug & Flea Killer. Using natural plant oils as the active ingredients in a water-based formula, it leaves no harmful residues. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

DIRECTIONS FOR USE

**Always read label directions and precautions prior to use.
Shake well before use and periodically during use.**

For optimal spraying, rotate the spray nozzle to point in the same direction as the red dot located on the top rim of the can. Point spray nozzle away from face and press button firmly to spray, holding the can upright.

Maggie's Farm Bed Bug & Flea Killer has a light scent of the natural plant oil active ingredients and contains no artificial fragrances. Spray a small area and let it dry to make sure you're okay with scent before treating mattresses or large areas. The scent may take a few days to fully dissipate.

Bed Bug Treatment: Kills bed bugs and their eggs.

For Bed Frame & Mattress Applications: Remove all bedding and wash and/or dry on hot setting to kill bed bugs. Remove the mattress and box spring from bed and disassemble the bed frame. Inspect and then spot spray until damp where you see bed bugs or their signs. Inspect all folds, tufts, seams and edging on the mattress where bed bugs hide. Also inspect the seams and underside of the box spring. Do not apply to the entire surface of the mattress and/or box spring, and do not saturate. Spray cracks/crevices and joints in bed frame, headboard and footboard. Spray bugs directly when possible. Allow mattress and box springs to dry completely before placing back on bed and putting on bedding. Repeat as necessary.

For Carpet/Rug Applications: In infested rooms, vacuum thoroughly and dispose of vacuum bag or canister contents in an outdoor trash can. Spray carpet/rug adjacent to, as well as under, the bed and furniture, using a smooth back and forth sweeping motion. Spray until damp. Avoid over-wetting carpets/rugs. Repeat as necessary.

For Upholstered Furniture: Inspect tufts, seams, folds and edges, and spot treat where you see bed bugs or their signs. Do not apply to entire surface. Repeat as necessary.

Luggage: Inspect and treat luggage if you suspect an infestation. As a preventative measure, lightly spray outer surfaces of luggage when traveling.

Flea Treatment: Kills adult fleas.

For Indoor Applications: Vacuum infested areas thoroughly and dispose of vacuum bag or canister contents in an outdoor trash can. Spray infested areas such as pet beds and resting quarters, nearby cracks and crevices such as behind baseboards, and localized areas of floor and floor coverings where fleas may be present. Spray until damp. Avoid over-wetting carpet/rugs. Allow to dry completely and vacuum again. Repeat as necessary. Old bedding of pets should be removed and cleaned or replaced with clean, fresh bedding after treatment of pet area. Do not treat pets with this product. Treat pets with a product labeled for application on animals.

For long-lasting residual protection against bed bugs and fleas, try Maggie's Farm Bed Bug Killer powder. If problems persist, contact a pest control professional.

Precautions

-We recommend good safety practices when using any insecticide, such as avoiding contact with eyes and skin and avoiding directly breathing spray mist. If product gets in eyes, flush with water for at least 15 minutes. If on skin, wash with soap and water. If irritation persists, or if more than an incidental amount is swallowed, seek medical attention, have this label with you.

- Plant oil scents can be objectionable to some people, particularly if used in enclosed areas. To get rid of the scent, clean up the spray with water and dish soap.

- Do not apply to food, feed or plants.

- Keep out of lakes, streams and ponds.

- To prevent electrical shock, do not apply the product into electrical outlets or electrical boxes, or on any bare wires.

- We have tested the product on a variety of surfaces without problems, but it is possible that the plant oils could damage some plastics or finishes or could stain some fabrics or porous surfaces, so test spray a small area first. If clean up is needed, use water and dish soap.

- Treated surfaces may be slippery when wet. Wipe away excess spray with a clean cloth or paper towel.

Physical Hazards: Contents under pressure. Keep away from heat, sparks and open flame. Exposure to temperatures above 130° Fahrenheit may cause container to burst.

Storage & Disposal: Store in a cool, dry area away from heat or open flame. When container is empty, recycle if available. Do not puncture or incinerate.

Limitations of Liability: Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.

Maggie's Farm Ltd represents that this product is a minimum risk pesticide and is exempt from registration under EPA FIFRA 25(b). This product is not EPA registered.
