

SPIDER & INSECT TRAP

How to Use the Maggie's Farm Spider & Insect Trap

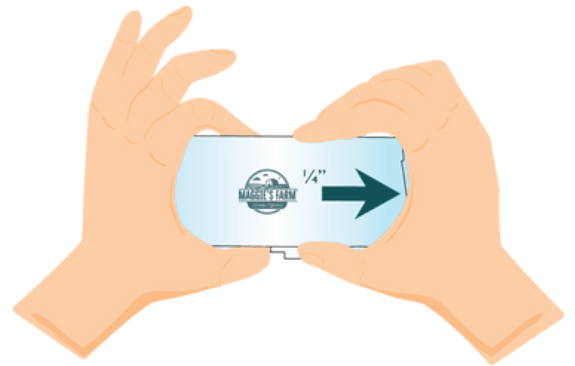

Step 1: Open the Station

Fig 1

- Place the station on a table so you can read the Maggie's Farm logo right side up.

- Squeeze the raised pads located in the center on both sides of the station, and slide the top to the right and lift it off.

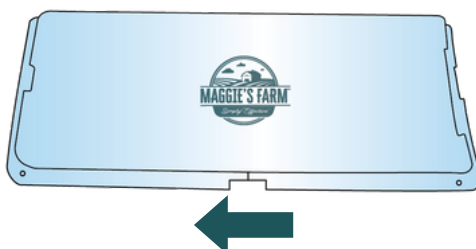

Step 2: Place the Glue Board

- Peel the protective paper off our Spider & Insect Trap glue board.
- Place the glue board in the bottom of the station base, sticky side up.

Note: Replace the glue board every three months or when it is full of insects.

Step 3: Close the Station

- Place the top on the base slightly to the right of the center, and slide it to the left until it clicks into place.
