

SPIDER & INSECT TRAP

Works 24/7 To Capture Spiders & Crawling Insects

Discreet • Sturdy • Low-Profile
• Patented

Pesticide-Free. Humane*.

Clean capture device • Easy to open & close
• Translucent station makes it easy to see when to replace glue board

1 Reusable Station + 3 Glue Boards

*Sturdy, low-profile station keeps pets & mice from getting stuck in glue

*When used as directed

Maggie's Farm Spider & Insect Trap captures: spiders, ants, cockroaches, crickets, silverfish, centipedes and other crawling insects. The super-sticky glue board that fits inside the re-usable Spider & Insect Trap station goes to work immediately after removing the protective paper, and works 24/7 to capture insects. The sturdy station protects the glue board, and helps keep children and pets from contacting the glue. Bugs are tough, but solutions should be simple and effective. Maggie's Farm is committed to offering products that are Simply Effective. It's as simple as that!

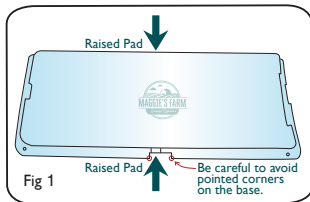

DIRECTIONS FOR USE:

(Scan the QR code or visit maggiesfarmproducts.com for a video).

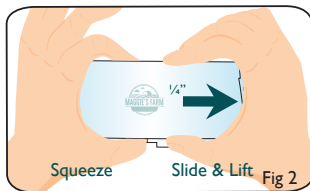

Use Maggie's Farm Spider & Insect Trap to capture spiders, ants, cockroaches, crickets, silverfish, centipedes and other crawling insects. The trap can be used for an active pest problem, or for prevention and detection.

Open the station:

- Place the station on a table so you can read the Maggie's Farm logo right side up.
- See Fig 1. Locate the raised pads on the two long sides of the Spider & Insect Trap station, just to the LEFT of center.

- See Fig 2. With your hands positioned OVER the station, use your LEFT hand to lightly squeeze the raised pads on the sides, then your RIGHT hand to slide the top about 1/4" to the RIGHT and lift off of the base. (Lefties may find it easier to turn the station the other way and squeeze with the right hand and slide the top off with the left hand.)

Place the glue board inside the station:

- Peel the protective paper off the glue board.
- Place glue board in the bottom of the station base, sticky side up.

Close the Station:

- Do the opposite of opening. Place the top of the station on the base, about 1/4" to the RIGHT of center. Then slide the top to the LEFT until it clicks into place.

Station Placement:

Place Maggie's Farm Spider & Insect Trap on level surfaces, typically along walls or edges, close to where you have seen insect activity. Target areas where insects come inside, harbor, congregate or travel. Areas include: next to doorways or windows, next to or under appliances, by trash bins, in cabinets, under beds, and in garages, basements or outbuildings.

Replace the glue board every three months, or when it's full of insects. If you are catching a large number of the same type of insect, visit maggiesfarmproducts.com for other family-friendly control options.

PRECAUTIONS:

Do not allow children or pets to play with the traps. The glue is sticky stuff! If it gets stuck somewhere it shouldn't, use something oily like vegetable oil or peanut butter to help release.

STORAGE & DISPOSAL:

Store glue boards in a cool, dry area away from heat and open flame. Dispose of used glue boards in the trash.

LIMITATION OF LIABILITIES:

Maggie's Farm Ltd makes no warranties of merchantability or fitness for any purpose except expressed on this label. Buyer assumes all responsibility for safety and use not in accordance with label directions and precautions.
